REPORT

ON THE

TRADE IN IMPORTS AND EXPORTS

AT

IRISH PORTS

DURING THE YEAR ENDED

31ST DECEMBER, 1911.

Presented to both Houses of Parliament by Command of His Majesty.

LONDON :

PUBLISHED BY HIS MAJESTY'S STATIONERY OFFICE.

To be purchased, either directly or through any Bookseller, from

E. PONSONBY, LIMITED, 116, GRAFTON STREET, DUBLIN ;

or

WYMAN AND SONS, LIMITED, FETTER LANE, E.C., and 32, ABINGDON STREET, S.W. ;

or

OLIVER AND BOYD, TWEEDDALE COURT, EDINBURGH ; or
from the Agencies in the British Colonies and Dependencies, the United States
of America, the Continent of Europe and Abroad of
T. FISHER UNWIN, LONDON, W.C.

PRINTED BY

A. THOM & CO., LTD., 87, 88, AND 89, ABBEY STREET, DUBLIN.

1912.

[Cd. 6397.]

Price 1s.

GOVERNMENT PUBLICATIONS.

1. **Government Publications** (with the exceptions mentioned in paragraphs 2 to 6) can be bought, either directly or through any bookseller, from—
 WYMAN AND SONS, LTD., Fetter Lane, London, E.C. ; or
 OLIVER AND BOYD, Tweeddale Court, Edinburgh ; or
 E. PONSONBY, LTD., 116, Grafton Street, Dublin.
 Booksellers, and the accredited agents of Free Public Libraries, are entitled to a discount of 25 per cent. from published prices.
2. **Hydrographical Publications of the Admiralty** are sold by—
 J. D. POTTER, 145, Minories, London E.C.
3. **Patent Office Publications** are sold at—
 The Patent Office, 25, Southampton Buildings, Chancery Lane, London, W.C.
 (N.B.—Classified Abridgments of Patent Specifications are sold also by Wyman and Sons, Ltd.)
4. **Ordnance Survey and Geological Survey Publications** can be purchased from—
 The Director General of the Ordnance Survey, Southampton ; or,
 The Superintendent, Ordnance Survey, Dublin ; or
 Agents in most of the chief towns in the United Kingdom.
 (N.B.—**Small Scale Maps** are, as a rule, procurable at Railway Bookstalls in England and Wales.)
5. The **Journal of the Board of Agriculture** is published monthly by the Board at 4 Whitehall Place, London, S.W. Price 4d.
6. The **London Gazette** is published on Tuesday and Friday evenings by Wyman and Sons, Ltd. Price 1s.

The following is a list of some of the more important Parliamentary and Official Publications recently issued:—

Statutes—

Public General Acts, Local and Personal Acts, 1912. In separate Acts, at varying prices.
Public General, Session 1910. With Index, Tables, &c. Cloth. ... 3s.
Second Revised Edition. 1235–1900. Vols. I. to XX. ... 7s. 6d. each
Statutes in Force. Chronological Table and Index of. 27th Edition. To the end of the Session 1 and 2 Geo. V. (1911). 2 vols. ... 10s. 6d.
Interregnum, 1642–1660. Acts and Ordinances of the. In 3 vols. (not sold separately). 30s.
Acts of the Parliaments of Scotland, 1424–1707. Revised Edition. ... 10s.
Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character. Issued in 1890 to 1911 ... 10s. each.
Statutory Rules and Orders revised, in force on Dec. 31, 1903. Vols. I. to XIII. 10s. each.
Statutory Rules and Orders in force on 31st December, 1909. Index to ... 10s.

PARLIAMENTARY DEBATES. House of Lords and House of Commons ; each daily part 3d. ; also issued in bound volumes with Index.

MINUTES OF PROCEEDINGS OF THE HOUSE OF LORDS. 1d. per 4 pp. Subscription, Session 1912, 30s.

VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS. 1d. per 8 pp. Subscription, Session 1912, 30s.

HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue.

STATISTICAL ABSTRACT, UNITED KINGDOM. Years 1896 to 1910. [Cd. 5841.] .. 1s. 9d.

COLONIAL IMPORT DUTIES. 1910. [Cd. 5926.] .. 3s.

GOVERNMENT OF IRELAND BILL. No. 136 .. 5d.

Do. do. Financial Provisions. [Cd. 6154.] .. 1d.

AGRICULTURAL STATISTICS, GREAT BRITAIN. 1911. Acreage and Live Stock ; Produce of Crops. [Cd. 6021, 6056.] .. 10d.

IMPERIAL INSTITUTE. Reports on Rubber and Gutta Percha. [Cd. 6022.] .. 9d.

AGRICULTURAL EDUCATION AND RESEARCH. Report on the Distribution of Grants, 1910–11. [Cd. 6025.] .. 3d.

CO-OPERATIVE SOCIETIES, INDUSTRIAL AND AGRICULTURAL, UNITED KINGDOM. Report with Statistical Tables. [Cd. 6045.] .. 1s. 8d.

STANDARD TIME RATES OF WAGES, UNITED KINGDOM. 1 January, 1912. [Cd. 6054.] .. 6d.

STRIKES AND LOCK-OUTS. Laws in British Dominions and Foreign Countries relating to Public Utility Services. [Cd. 6081.] .. 1s. 5d.

STATISTICAL ABSTRACT FOR THE BRITISH EMPIRE, 1896–1911. [Cd. 6082.] .. 1s. 3d.

FORESTRY IN SCOTLAND. Report of Committee, with Evidence, &c. [Cd. 6085.] .. 1s. 3d.

SHIPPING CASUALTIES, 1910–11. [Cd. 6093.] .. 4s. 3d.

TRADE UNIONS. Report for 1908–1910. [Cd. 6109.] .. 1s.

VIVISECTION. Royal Commission. Final Report. [Cd. 6114.] .. 1s. 3d.

ESTABLISHED CHURCH. WALES. Bill No. 176 .. 3½d.

SEA FISHERIES. ENGLAND AND WALES. Report, 1910. [Cd. 6120.] .. 2s. 3d.

COMMERCIAL ARBITRATION. FOREIGN COUNTRIES AND COLONIES. [Cd. 6126.] .. 4d.

IRISH FINANCE COMMITTEE. Report. [Cd. 6153.] .. 3½d.

CONCILIATION. TRADE DISPUTES. Report, 1911. H.C. 87 .. 9d.

DUBLIN CASTLE,

27th August, 1912.

SIR,

I have to acknowledge the receipt of your letter of the 24th instant, forwarding, for submission to His Excellency the Lord Lieutenant, the Report on the Trade in Imports and Exports at Irish Ports for the year ended 31st December, 1911.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,

Department of Agriculture

and Technical Instruction,

Dublin.

REPORT ON THE TRADE
IN
IMPORTS AND EXPORTS AT IRISH PORTS
DURING THE YEAR 1911.

TO THE SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Eighth Report on Irish Imports and Exports dealing with the year ended 31st December, 1911.

As has been explained in previous issues these Reports present serious difficulties in collection and classification of information, and though steady progress has been made in improving the returns it should be clearly understood that the present system of returns is not fully satisfactory, and in view of the importance of this consideration it is desirable to submit again a statement as to the present sources of information and the limitations which affect the reliability of these statistical returns.

From 1825, when the system of separate Customs was abolished, no record has been kept until recent years as to the trade between Great Britain and Ireland. Occasional returns were forthcoming regarding the quantities of particular articles imported or exported, but such information was slight and affords small clue to the changes which have taken place during the past 87 years. Since 1878 records exist with regard to the numbers of live stock exported from and imported into Ireland, but this is almost the only part of the cross-Channel trade of which a systematic account has been kept. In the case of foreign trade, the principal articles of the direct trade between Irish ports and the Colonies and foreign countries have been published for many years by the Board of Customs in their Annual Statement of the Trade and Navigation of the United Kingdom. But the extent of this direct Irish foreign trade is very small, and amounts to $12\frac{1}{2}$ per cent. or one eighth of the total external trade of Ireland with Great Britain and other countries.

On undertaking the work of compiling a comprehensive statement of Irish imports and exports, the Department, having no statutory authority to require returns of imports and exports, found that the only materials of information available as to the external trade of Ireland were those contained in the “manifests”—

shipping documents in which are entered the items of cargo and their weight. Arrangements were accordingly made with the several port and harbour authorities, and in other cases directly with the shipping companies, to secure records, based on these manifests, of the cargoes landed or shipped at Irish ports, excluding such cargoes as are simply carried from one Irish port to another. But the ship's manifest is itself in three respects a very imperfect source of information—first, as regards the description and classification of goods; second, in respect of their net weight or measure; and third, as to the money value of the goods. First, the description of certain classes of goods, especially manufactured articles, is general and indefinite. Thus, typewriters, sewing machines, bicycles, and gas engines are in many cases entered in the manifests as “machinery.” Similarly, goods widely varying in character and value are returned under the general heading of “drapery.” This defect, which makes accurate returns for such classes of articles impossible, is due to the fact that the description of goods entered in the manifest is made with a view to the rate-book, in which a system of general classification is necessary, whereas in a statement of imports and exports accurate particulars are of the greatest importance. Second, while the manifest generally furnishes a statement as to the weight of goods, the weights are in most cases gross, and, consequently, in estimating values, allowance has to be made for tare and packing; this is not an easy matter, especially in respect of the imports of manufactured goods. Third, the manifests contain no statement of the value of the goods, and the shipping companies and harbour authorities are unable to state the value. As, however, it is of great importance that not only the quantity but also the money value of the several imports and exports should be stated, an official estimate of values has to be made.

In forming such estimates careful inquiries have been carried on from year to year among importers and exporters regarding the character and value of the goods entered under the different headings, while the values of goods shown by the Customs and Excise Department in their Annual Statement of Trade, and the current prices, as reported on authoritative market lists during the year, have also been consulted. But no matter what care is taken in making such supplementary inquiries, the work of valuation remains one of very considerable difficulty, and the absence of declared values is a serious defect in such returns. For, even though declarations of value may not in all cases be relied upon, in most cases such values are given truly, while by means of a proper system of scrutiny errors and wrong declarations can be to a large extent checked. Declared values, where properly supervised, are better than the best system of official values.

In view, therefore, of these defects in the original documents of information, it cannot be too plainly stated that these Reports do not furnish an adequate account of the external trade of Ireland, and that if full and accurate returns are to be obtained it is necessary to

establish a system which will insure that (1) the description, (2) the weight or measure, and (3) the value of goods whether imported into or exported from Ireland shall be clearly declared by the consignors or consignees.

While, however, the present returns are thus limited as regards completeness and accuracy, much information, sufficiently approximate to be of great practical value, has been obtained. First, the present series of returns furnishes a far more complete record than has been hitherto available as regards the total quantity and value of goods entering or leaving Irish ports, and has shown that the external trade of Ireland is much greater in extent and more representative in character than was hitherto believed. Second, in the case of agricultural produce, raw materials, and many of the more simple articles of manufacture, a fairly reliable approximation to the actual quantity and value imported and exported can now be made. Third, even with regard to the percentage of trade (approximately 25 per cent. of the total trade), in which the returns describe inadequately the classes of goods, and as to which the estimated values are liable to serious error, careful inquiries have been made, in which many exporters and importers have most generously facilitated the work of the Department, so as to reduce the possibilities of error and to ascertain as closely as possible the average value of these imports and exports. Fourth, it should be added that the returns have brought home the practical importance to Irish trade and industry of a system which will secure regular and reliable information with regard to the imports and exports of the country.

In the tables and figures herewith submitted, as explained in previous issues in this series of Reports, Irish imports and exports mean all goods imported or exported by Ireland, whether from or to Great Britain, the Colonies, or foreign countries—the terms including not only the Colonial and foreign, but also the Cross-Channel trade between Great Britain and Ireland. The import and export trade is thus the sum of three things: (1) the direct trade between Ireland and all other countries outside of Great Britain; (2) the indirect trade of Ireland with these same countries *via* Great Britain; and (3) the local trade between Ireland and Great Britain.

As a result of inquiries which have been carried on each year since the figures for 1904 were published, a more accurate estimate can now be made regarding the values of certain classes of produce imported and exported during these years. In all such cases the figures have been revised. Where also information has been obtained as to imports and exports, regarding which no record was available when the previous Reports were published, an estimated allowance has been added for such trade. The figures have in this way been kept as strictly comparable as possible.

The total import and export trade at Irish ports in 1911 is estimated at £131,940,725 as compared with £131,466,566 in 1910, an increase of £474,159. Imports and Exports in 1911. The imports amounted to a total of £66,732,684 and the exports to a total of £65,208,041. The increase in the estimated value of the trade in 1911 as compared with 1910 has taken place only in imports, the increase amounting to £1,252,908, while in exports there has been a fall of £778,749. The following statement shows the total estimated values of imports and exports in the eight years 1904–1911 :—

			Imports.	Exports.	Total.
			£	£	£
1904	54,460,182	49,784,760	104,244,942
1905	56,148,247	51,392,547	107,540,794
1906	57,910,339	56,005,305	113,915,644
1907	62,119,423	59,159,532	121,278,955
1908	59,260,782	57,414,977	116,675,759
1909	64,241,932	61,044,155	125,286,087
1910	65,479,776	65,986,790	131,466,566
1911	66,732,684	65,208,041	131,940,725
1911 over 1904	12,272,502	15,423,281	27,695,783
„ „ 1905	10 584,437	13,815,494	24,399,931
„ „ 1906	8,822,345	9,202,736	18,025,081
„ „ 1907	4,613,261	6,048,509	10,661,770
„ „ 1908	7,471,902	7,793,064	15,264,966
„ „ 1909	2,490,752	4,163,886	6,654,638
„ „ 1910	1,252,908	—778,749	474,159

It will be seen that the values of imports have shown an increase each year since 1904, with the exception of the year 1908, while the exports though less than in 1910 still show an increase over previous years.

From these figures it will be seen that the trade in 1911 shows a slight improvement on 1910, and exceeds the records of any of the preceding years. In considering, however, the increases or decreases in trade it should be borne in mind that the rise or fall in the total value is to a considerable extent due to the rise or fall in the prices of commodities. In recent years—in fact since 1896—there has been a marked upward tendency in prices, and considering in particular the period from 1904 to 1911 it appears that prices rose in 1905, 1906, and 1907, fell in 1908, and increased again in 1909, 1910, and 1911. Accordingly, although the total value of the import and export trade of Ireland has increased in a most satisfactory manner since 1904, the increase in the *volume* of the trade has not been so great. This latter increase may be measured by assuming that prices have remained the same in each succeeding year as in 1904. If prices had remained the same as in 1904 the increases in the total values of imports and exports in 1911 over the preceding years would have been :—

1911 over 1904	£11,410,157	instead of	£27,695,783
„ „ 1905	8,587,735	„	24,399,931
„ „ 1906	5,600,785	„	18,025,081
„ „ 1907	2,990,747	„	10,661,770
„ „ 1908	6,054,416	„	15,264,966
„ „ 1909	2,314,732	„	6,654,638
„ „ 1910	6,577	„	474,159

If the years 1910 and 1911 are compared, on the assumption that the prices in 1911 remained the same as in 1910, the increase in the value of imports would have amounted to £652,232 instead of £1,252,908, and the decrease in the value of exports to £645,655 instead of £778,749. But figures which are based on current prices, and thus allow for the change in value as well as in volume, remain the best index of the commercial importance of Irish trade.

It will also be remembered that the figures in the tables of imports and exports include not only articles imported for home consumption but also consignments which have been returned or re-exported without going through any process of manufacture, as with the present restricted means of information it is not possible to distinguish imports or exports from what are strictly speaking returned exports or returned imports. But, as has been pointed out in previous reports, this trade is a small proportion of the total Irish trade. In the case of certain articles such as tea, coffee, sago, it is evident that the quantities exported represent re-exports, which it may be assumed have undergone no change, and are either being returned or in certain cases re-distributed. In respect of other articles, however, such as leather, apparel, machinery, etc., it is a matter of considerable difficulty to ascertain, even approximately, the proportion of (a) goods which are re-exports or returned goods, (b) goods which having been imported and having undergone some process of manufacture are then exported, and (c) goods which are largely or wholly the product of Irish industry. Making as careful an estimate as existing information permits it would appear that in 1911 goods to the value of approximately £2,500,000* may be taken to have been returned or re-exported without undergoing any process of manufacture. Deducting this sum from the totals of imports and exports respectively it leaves in 1911 for the purposes of Irish consumption and manufacture a net total import of approximately, £64,232,684, and a net Irish export of approximately, £62,708,041, the total Irish trade, excluding re-exports, amounting in 1911 to £126,940,725. The corresponding figure for 1910 was £126,666,566. The re-imports are small.

*The main articles contributing to this total figure are :—Wines, foreign and colonial spirits, guns and rifles, butter, chemicals, dyes and tanning substances, glass and glassware, maize, hops, Indian meal, rice, sago, etc. ; boots and shoes, indiarubber goods, musical instruments, machinery and hardware, oils, paints, sponges, sugar, tea, raw cotton, piece goods, haberdashery, unmanufactured tobacco. The largest re-export is raw cotton, almost all of which was shipped from Belfast, the value re-exported in 1907 being £1,253,894 ; in 1908, £1,473,771 ; in 1909 £1,243,495 ; in 1910, £904,032 ; and in 1911, £917,799.

(i.) Miscellaneous Articles	209,679	201,370	130,814	161,438	168,508
Total of Manufactured Goods	20,782,673	19,045,297	22,100,536	26,261,776	26,931,094
Gross Total	59,159,532	57,414,977	61,044,155	65,986,790	65,208,041

In order to indicate briefly the main divisions of the trade the preceding summary has been adopted, showing respectively the various classes of (1) farm produce, food and drink stuffs, (2) raw materials, and (3) manufactured goods. Any such classification has drawbacks. There are certain goods which might be placed in one class or another. Thus hides and skins, wool, flax, etc., which are farm produce, are classed under raw materials. Thus also a number of articles in the first group, *e.g.*, butter, bacon, wines, ales, spirits, tobacco, etc., have undergone varying degrees of manufacture and might be classed as manufactured imports and exports. But the present division is simple, well known, and of practical interest, and with the particulars set forth in the accompanying tables it is easy to re-arrange the groups for other purposes of comparison as may be required.

These summary tables show that the percentages of the three classes which make up the total values of imports and exports were in 1911 as follows :—

	IMPORTS.	EXPORTS.
(1) Farm Produce, Food and Drink Stuffs	36	53
(2) Raw Materials	14	6
(3) Manufactured Goods	50	41
Total ..	100	100

It will be seen from the summary tables that in the case of imports the increase in 1911 has taken place in farm produce and in manufactured goods while there has been a decrease in raw material imported. The articles classed as farm produce which show the largest increases were bacon and maize, the imports of each of these being over £130,000 greater than in 1910. In manufactured goods the increase has taken place chiefly in respect of the goods classified as metal and metal castings, the imports of which exceed those of 1910 by an estimated value of over £300,000.

In the case of exports the value of farm produce is less than that of the years 1908, 1909, and 1910, but is greater than the exports of earlier years. In raw materials there is again a marked decrease in the value of lard exported. In the group of manufactured goods however there is an increase in exports which is mainly due to the increased output of shipping tonnage at Belfast during the year 1911.

Following the classification in the above summary attention is directed to the main groups and the articles of chief importance in them.

I.—FARM PRODUCE, FOOD AND DRINK STUFFS.

The group of farm produce, food and drink stuffs represents an import and export amounting in 1911 to £58,439,705 out of a total of all imports and exports estimated at £131,940,725. It is important to note that a very large proportion of even the imports into Ireland consist of agricultural produce:—bacon, eggs, poultry, butter, grain, flour, food stuffs, fruit, and vegetables. And if to these articles are added flax, hides, wool, skins, etc., which are included under raw materials, the total import of farm produce alone almost reaches £21,000,000, marking a decrease on the preceding year in these commodities. This feature of Ireland's trade deserves close attention, as it is significant that this country with its agricultural capacity and potentiality should be annually importing so great a quantity of farm produce, much of which it is admirably suited to raise at home.

In the case of exports from Ireland, live stock, bacon and hams, butter, poultry, eggs, oats, potatoes, vegetables, and flax, etc., together with the products of the live stock industries, such as hides, skins, wool, feathers, etc., amount to a value altogether approaching £31,000,000 or nearly half the total exports of Ireland. Large as this export is, the fact is seldom realised that Ireland, while exporting annually farm produce and food stuffs to the value of £31,000,000 is importing other food stuffs and farm commodities of a value of almost £21,000,000.

The several articles belonging to the large group of farm produce, food and drink stuffs are mostly simple in character, and for this reason the quantities and values in this division as also in that of raw materials represent in all probability the actual extent and value of the trade much more closely than is the case with manufactured articles.

The first and still the chief agricultural export of Ireland is that of live stock amounting in 1911 to a total estimated value of £13,463,768, a decrease of over £2,000,000 as compared with the export of 1910. This decrease is mainly attributable to the drought which prevailed during the summer of 1911. With regard to the main items in this class in 1911 the export of horses showed a decrease as compared with 1910, though greater than the export of 1908 and 1909. In cattle there was an increase in the export of fat stock and a big decrease as compared with 1910 in stores, reaching the lowest figure of recent years. The total number of cattle shipped in 1911, amounting to 695,529, was below the export of any previous years since 1902. The shipments of sheep and lambs in 1911 fell below those of any of the preceding ten years. In the case of swine the decrease in exports has been checked, the number exported in 1911 amounting to 342,340 as compared with 324,071 in 1910, which was the lowest figure on record since 1878, when the published returns of the exports of animals from Ireland were first issued.

The following statement gives the numbers and estimated values of live stock exported in the years 1908, 1909, 1910, and 1911 :—

	Number				Value			
	1908	1909	1910	1911	1908	1909	1910	1911
Horses, ..	28,804	29,365	31,894	31,710	£ 1,347,225	£ 1,369,395	£ 1,492,015	£ 1,473,690
Cattle—Fat ..	258,972	266,269	260,260	269,966	4,264,406	4,351,279	4,351,764	4,460,063
Stores, ..	529,042	506,138	543,788	390,294	6,317,169	6,096,145	6,801,504	4,947,563

Other, ..	9,739	13,377	12,324	8,789	29,217	40,131	36,972	26,367
Total Cattle, ..	862,634	838,583	869,181	695,529	10,935,197	10,751,550	11,454,285	9,566,393
Sheep, ..	367,224	431,241	348,018	306,312	826,477	830,885	769,812	647,497
Lambs, ..	358,333	443,060	383,684	350,858	489,722	526,134	492,394	437,111
Total Sheep & Lambs	725,557	874,301	731,702	657,170	1,316,199	1,357,019	1,262,206	1,084,608
Swine, Fat, ..	371,537	316,891	301,576	323,574	1,300,380	1,426,010	1,281,698	1,294,296
„ Stores, ..	15,939	10,238	22,495	18,766	31,878	25,595	50,614	37,532
Total Swine, ..	387,476	327,129	324,071	342,340	1,332,258	1,451,605	1,332,312	1,331,828

Live stock imports into Ireland are very small, the total estimated value of the same in 1911 amounting to £262,436 as compared with £275,881 in 1910. This figure, it should be remembered, includes a considerable number of horses which are temporarily imported chiefly for sporting purposes and which also swell the export returns. The largest farm stock import is of sheep and lambs, of which 16,824 were imported in 1911 as compared with 38,736 in 1910. A few breeding cattle are also imported.

The exports and imports of dead meat, bacon and hams, game, etc., form also a very important and interesting class. In 1911 the total value of these exports from Ireland was estimated at £3,935,096 while the corresponding imports amounted to £2,577,566. The exports mark a slight fall as compared with 1910, but they are still greater

than any year since 1904, while the imports are greater than in 1910, but less than in any year since 1905. The following table shows for the years 1908—1911 the estimated total value of each main class imported and exported :—

IMPORTS.

	Quantities.				Values.			
	1908	1909	1910	1911	1908	1909	1910	1911

Total of above, ..	1,279,374	1,226,143	1,243,522	1,341,747	3,463,029	3,795,643	4,071,570	3,935,096
Provisions and Groceries (b)	24,520	19,697	19,197	20,159	68,656	65,000	67,190	60,477

There are many interesting points to note in this table. As regards imports it will be seen, first, that in 1911 the total of foreign and colonial beef imported into Ireland showed an increase over 1908, 1909 and 1910 ; second, that there was a most remarkable falling off in the import of foreign and colonial bacon and hams into Ireland in each of the years 1909 and 1910, but the quantities imported in 1911

(a) Poultry is not included here.

(b) It is found that under this heading considerable quantities of bacon and hams are exported. Owing to improved returns, many of these quantities formerly returned under this heading are now definitely specified as bacon or hams.

show an increase of 29 per cent. as compared with the quantity imported in 1910.

With regard to the exports from Ireland there was a considerable increase in the quantity of bacon and hams as compared with the figures of 1910, but in consequence of the fall in prices the total estimated value showed a decrease on the preceding year, the estimated value of these exports in 1911 amounting to £3,493,839. This total exceeded by £1,583,102 the estimated value of the total imports of bacon and hams in 1911. If to this export is added the export of pork and coarse pig meat, the value of the products of the pig exported will amount to over £3,500,000 sterling. It is interesting thus to note that, including the export of live pigs, the total export value of pigs and pig produce in 1911 amounted to a sum of close on £5,000,000 sterling.

The import of preserved and tinned meat increased in 1911 to £143,531 as compared with £114,023 in 1910, and the export of preserved and tinned meat increased from an estimated value of £14,555 in 1910 to £27,834 in 1911. Additional quantities of tinned meat are probably shipped under the name of "Provisions and Groceries."

The returns indicate a decrease in the export of poultry as compared with 1910. The estimated value
Poultry. exported in 1911 amounted to £850,926 as compared with £927,035 in 1910, £857,276 in 1909, £797,376 in 1908, and £847,247 in 1907. It is estimated that one-third of these values consisted of live poultry.

There was an increase in the quantity of eggs exported in 1911 as compared with 1910, the total quantity exported
Eggs. being greater than in 1909 and 1910 but less than in any of the years 1906, 1907, or 1908. The value in 1911 is the highest recorded since 1904.

The following statement shows the quantities and estimated values of imports and exports of eggs during the years 1904—1911 :—

Year.	Imports.		Exports.	
	Gt. Hds.	Value. £	Gt. Hds.	Value. £
1904	114,192	37,112	5,738,129	2,044,208
1905	116,380	41,218	6,194,132	2,387,322
1906	99,755	37,408	6,494,532	2,604,578
1907	103,107	41,036	6,675,599	2,781,500
1908	101,999	41,487	6,501,195	2,729,147
1909	81,891	34,805	6,362,714	2,863,221
1910	92,101	39,191	6,227,820	2,744,133
1911	97,638	43,512	6,488,776	2,940,227

The exports of eggs and poultry together in 1911 amounted to £3,791,153, and if to this is added the export of feathers, amounting in 1911 to £34,921, a total export of £3,826,074 is recorded. These

figures do not include the value of the quantity sent by parcel post.*

The imports of poultry and eggs into Ireland are small, amounting in 1911 to £63,456 as compared with £52,687 in 1910. Thus, in estimating the value of the poultry and egg industry to the country, it should be borne in mind that practically the entire home demand is supplied by the home article, and that the export represents the surplus production of poultry and eggs. These facts bring home the great importance and value of the poultry and egg industries to Ireland. Attention is specially directed to diagram III. (see page xxxiv) which shows for the year 1911 (1) the total monthly import of eggs into the United Kingdom from foreign and colonial countries ; (2) the quantity of eggs exported from Ireland each month ; and (3) the monthly average export price of Irish eggs.

There was again a considerable fall in the quantity of butter exported. The monthly export was greater for each of the first six months of 1911 as compared with 1910, but each of the months—July, August, September and December showed a big decrease as compared with the corresponding month of the previous year. It should be noted that the imports of butter, though trifling as compared with the exports show a distinct tendency to increase, the imports in 1911 being considerably greater than in 1910, while the latter showed a marked increase on those of 1909.

The changes in the quantities and values of butter imported into and exported from Ireland during the period 1904—1911 may be seen from the following table :—

Year.	Imports.		Exports.	
	Quantity.	Value.	Quantity.	Value.
	Cwts.	£	Cwts.	£
1904	59,053	300,924	818,252	3,666,792
1905	57,438	314,234	813,921	4,048,409
1906	60,194	350,128	844,027	4,283,437

1910	77,945	477,798	698,907	3,584,810
1911	88,472	535,207	688,362	3,671,264

* So far as agricultural produce is concerned the parcel post trade is mainly confined to the carriage of butter, eggs, and poultry. Through the courtesy of the Postmaster-General, the Department have been informed that approximately 3,360,000 parcels are posted annually from Ireland to Great Britain that it is estimated that about 1,120,000 parcels are of butter, eggs, and poultry and that the average weight of all inland parcels is 2 lb. 10 ozs. Assuming the export of butter, eggs, and poultry by parcel post to have an average weight per parcel of 3 lbs., the export by parcel post of butter, eggs, and poultry would amount to 30,000 cwts.

As in the case of eggs, these figures do not include quantities sent by parcel post. There is also difficulty in obtaining a record of small consignments of butter under 28 lbs. as these are frequently entered in the returns as "parcels" or "sundries." And as there is reason to believe that this class of trade is on the increase the fact may to some extent account for the apparent shrinkage in exports. Attention is directed to diagram II. (see page xxxiv) which shows for the year 1911 (1) the imports of butter into the United Kingdom from the Colonies and foreign countries; (2) the quantity of butter exported each month from Ireland; and (3) the average monthly export price of Irish creamery butter.

The quantity of margarine imported in 1911 amounted to 56,163 cwts., valued at £146,024, as compared with 54,376 cwts., valued at £142,737 in 1910. The exports of margarine amounted to an estimated value of £190,245 in 1911 as compared with £186,753 in 1910.

Margarine.

The returns showed an increase in the imports of cheese; the quantity imported in 1911 amounting to 46,573 cwts., valued at £142,048, as compared with 43,560 cwts., valued at £120,879 in 1910; 42,611 cwts., valued at £121,441 in 1909; 36,159 cwts., valued at £103,053 in 1908; and 44,445 cwts., valued at £128,890 in 1907. There was an increase in the small export of cheese, the quantity exported in 1911 amounting to 6,031 cwts., valued at £18,395; as compared with 3,365 cwts., valued at £9,338 in 1910; 4,015 cwts., valued at £11,443 in 1909; 3,231 cwts., valued at £9,208 in 1908; and 2,460 cwts. in 1907 valued at £7,134.

Cheese.

There was an increase in the export of fish from Ireland in 1911, the total value of fish, including shell-fish, exported being estimated at £737,482 in 1911, as compared with £633,669 in 1910; £724,476 in 1909; £440,461 in 1908; and £402,746 in 1907. The increase was chiefly in the export of cured herrings, shipped mainly from Londonderry and Downings; the quantity of salmon and trout also showing an increase. On the other hand the value of fish, including shell-fish, imported in 1911 was estimated at £298,025, as compared with £309,613 in 1910; £323,656 in 1909; £277,431 in 1908; and £272,849 in 1907.

Fish

In the summary tables on pp. x. and xi., grain and other foods intended for human consumption have, as far as possible, been distinguished from the feeding-stuffs for animals, as it is important to see the respective amounts of these two kinds of imports. In several cases, however, the imports may be, as in the case of oats or of Indian meal, partly for food-stuffs and partly for cattle feeding, and therefore this division can only indicate broadly the extent of the two classes of imports.

Grain and Vegetable Produce.

Much the largest import among the grain goods is wheat and wheat flour. The quantities and estimated values imported into Ireland respectively in the years 1904, 1905, 1906, 1907, 1908, 1909, 1910 and 1911 were as follows :—

			Wheat Imports.		Wheat Flour Imports.	
			Quantity.	Value.	Quantity.	Value.
			Cwts.	£	Cwts.	£
1904	6,932,956	2,599,857	5,529,278	2,764,639
1905	7,502,728	2,907,307	5,596,214	2,798,107
1906	6,927,827	2,439,172	5,399,355	2,521,187
1907	7,147,511	2,829,223	5,261,607	2,652,726
1908	6,764,866	2,931,442	4,697,156	2,563,865
1909	8,233,011	3,979,289	4,513,657	2,595,353
1910	7,997,988	3,532,445	4,602,990	2,685,078
1911	7,839,093	3,233,626	5,001,058	2,625,555

From these figures it appears that the quantity of wheat imported in 1911 was less than in 1909 and 1910, but much greater than in any of the five previous years, while the total value of the imports was estimated to be £302,184 higher than in 1908. The imports of wheat flour on the other hand, showed an increase in quantity in 1911, the total amount imported being greater than in 1908, 1909 and 1910, but less than in any of the four previous years. In the agricultural statistics of Ireland the amount of Irish-grown wheat in 1911 was estimated at 887,188 cwts., and if it is assumed that one and a-half tons of wheat produce one ton of flour, the total quantity of flour represented by imports of wheat and flour and by home-grown wheat amounted to 10,818,579 cwts. From this quantity has to be deducted an export of flour, or its equivalent in wheat, amounting to 276,906 cwts., leaving thus a residue of 10,541,673 cwts. for consumption in Ireland.

In the case of oats the imports amounted to 335,026 cwts. in 1911, as compared with 452,597 cwts. in 1910; 583,372 cwts. in 1909; 401,095 cwts. in 1908, and 190,049 cwts. in 1907, while the exports amounted to 1,358,563 cwts. in 1911, as compared with 1,175,241 cwts. in 1910; 1,249,172 cwts. in 1909; 1,449,111 cwts. in 1908; and 1,595,275 cwts. in 1907. The imports of oatmeal rose to 172,909 cwts. in 1911, as compared with 169,358 cwts. in 1910; 134,748 cwts. in 1909; 194,798 cwts. in 1908; and 174,185 cwts. in 1907; the exports amounted to 111,397 cwts. in 1911, as compared with 146,526 cwts. in 1910; 164,998 cwts. in 1909; 150,044 cwts. in 1908; and 181,228 cwts. in 1907. But, as was pointed out in previous Reports, in considering the imports of oatmeal, allowance must be made for a quantity of what is returned as “meal,” estimated roughly at one-third, being oatmeal or similar meals for human consumption, the remaining two-thirds of these unclassified meals being cattle meals. The quantities of “unclassified” meals in the imports which diminished from 219,645 cwts. in 1907 to 130,753 cwts. in 1908, rose to 193,590 cwts. in 1909, fell to 134,986 cwts. in 1910, and again shows a marked increase to 185,547 in 1911.

The quantity of barley imported in 1911 amounted to 1,152,323 cwts. as compared with 989,804 cwts. in 1910 ; 1,216,627 cwts. in 1909 ; 1,181,987 cwts. in 1908 ; and 1,060,549 cwts. in 1907. The exports of barley showed a remarkable increase, the shipments amounting to 150,499 cwts. in 1911 as compared with 20,515 cwts. in 1910 ; 211,891 cwts. in 1909 ; 36,778 cwts. in 1908 ; and 29,185 cwts. in 1907. The exports of malt increased to 76,890 cwts. in 1911 as compared with 72,892 cwts. in 1910 ; 161,045 cwts. in 1909 ; 79,379 cwts. in 1908 ; and 85,132 cwts. in 1907. The imports of malt amounted to 830,597 cwts. in 1911 as compared with 735,196 cwts. in 1910 ; 652,872 cwts. in 1909 ; and 808,817 cwts. in 1908.

Among feeding stuffs the chief import is maize, a very great quantity of which is annually imported into Ireland. A considerable quantity, however, is each year re-exported—in 1911 to the value of £124,741. The following are the total quantities and values of maize imported in the years 1904—1911 :—

—				Quantity.	Value.
				Cwts.	£
1904	13,251,493	3,147,229
1905	11,268,018	2,957,854
1906	13,404,190	3,295,197
1907	15,147,026	4,133,876
1908	10,924,929	3,368,520
1909	12,527,450	3,862,630
1910	11,435,688	3,168,639
1911	11,927,375	3,304,877

Together with the above import of maize, the imports of bran, pollard, and the various classes of cattle meals, brought the total value of feeding stuffs imported in 1911 to a sum estimated at £4,443,251 as compared with £4,284,055 in 1910 ; £5,007,091 in 1909 ; £4,417,586 in 1908 ; and £5,164,899 in 1907.

The imports of fruit into Ireland are considerable, being estimated at £797,316 in 1911 as compared with £806,073 in 1910 ; £778,948 in 1909 ; £699,625 in 1908 ; and £687,026 in 1907. The exports of fruit are comparatively small, although the returns do not adequately represent the extent of the trade.

In the case of jams and preserves the imports amounted in value to £206,879 in 1911 as compared with £177,177 in 1910 ; £172,339 in 1909 ; £147,963 in 1908 ; and £140,823 in 1907. The exports amounted in value to £82,514 in 1911 as compared with £75,230 in 1910 ; £61,879 in 1909 ; £56,324 in 1908 ; and £56,481 in 1907.

Among vegetables the largest import is that of onions, of which 239,187 cwts. were imported in 1911 as compared with 241,439 cwts. in 1910; 219,706 cwts. in 1909; 223,488 cwts. in 1908; and 237,136 cwts. in 1907. The chief export of vegetables is that of potatoes, of which 183,230 tons were exported in 1911, valued at £641,305, as compared with 119,870 tons in 1910, valued at £389,578; 119,785 tons in 1909, valued at £341,886; 109,681 tons in 1908, valued at £379,313; and 100,309 tons in 1907, valued at £394,967.

There was a decrease in the quantity of tea and sugar imported in 1911. The quantity of tea imported was returned as 33,047,616 lbs. in 1911 as compared with 34,024,592 lbs. in 1910; 34,334,832 lbs. in 1909; 32,837,728 lbs. in 1908; and 32,890,256 lbs. in 1907; the quantity of coffee imported showed an increase, being returned at 1,258,320 lbs. in 1911 as compared with 1,206,464 lbs. in 1910; 1,274,784 lbs. in 1909; 1,293,152 lbs. in 1908; and 1,311,148 lbs. in 1907. The quantity of sugar imported was 2,721,965 cwts. in 1911 as compared with 2,800,988 cwts. in 1910; 2,857,832 cwts. in 1909; 2,697,955 cwts. in 1908; and 2,819,987 cwts. in 1907. The quantities of tea, coffee, and sugar mentioned here are gross weights.

The quantities and estimated values of the imports and exports of manufactured tobacco for the years 1907 to 1909 which appear in this report, differ from those which appeared in the reports for those years. Inquiry last year showed that the tares which had been assumed for reducing gross to net weights for both imports and exports were too high, and accordingly the quantities as at present estimated are larger than those previously published. A change was also made in the estimated values of "manufactured" tobacco, as it was found that in reports previous to 1910 they were inadvertently estimated as inclusive instead of exclusive of duty. The following table shows the revised total quantities and estimated values of the imports and exports of "manufactured" tobacco during each of the years 1904 to 1911:

			Imports.		Exports.	
—			Quantity.	Value.	Quantity.	Value.
			lbs.	£	lbs.	£
1904	2,260,541	291,987	4,839,397	302,462
1905	2,250,002	290,625	5,605,281	350,330
1906	2,577,884	332,977	6,173,601	385,850
1907	2,057,708	265,787	6,152,943	384,559
1908	2,774,753	358,406	6,451,888	403,243
1909	2,979,637	384,870	7,292,891	455,806
1910	3,299,448	426,179	7,550,598	471,912
1911	3,155,712	407,613	7,744,710	484,044

The imports of unmanufactured tobacco amounted to 13,931,626 lbs. in 1911 as compared with 14,183,918 lbs. in 1910; 12,977,483 lbs. in 1909; 11,374,445 lbs. in 1908; and 10,622,771 lbs. in 1907. These quantities of both manufactured and unmanufactured tobacco are net weights.

The total estimated value of wines, spirits, ales, etc., imported showed a continued fall from £1,201,401 in 1907 to £1,195,515 in 1908, and to £1,118,223 in 1909, but marked a slight increase to £1,171,339 in 1910, and reached £1,255,683 in 1911. The imports of British spirits fell from a value of £59,588 in 1910 to £50,452 in 1911, while foreign spirits rose from £98,684 in 1910 to £103,513 in 1911, and ale and beer from £489,333 in 1910 to £588,775 in 1911. The total estimated value of spirits, stout, porter, etc., exported amounted to £4,379,767 in 1911 as compared with £4,251,120 in 1910 ; £3,731,495 in 1909 ; £4,280,838 in 1908 ; and £4,300,028 in 1907. The value of home-made spirits, which fell from £2,315,309 in 1907 to £2,299,964 in 1908, and to £1,739,979 in 1909, increased to £2,045,300 in 1910, and again marked a slight increase in 1911 to £2,050,199. The value is, however, still below that of any year since 1904, with the exception of 1909 and 1910. The value of stout and porter exported was estimated at £1,926,562 in 1911 as compared with £1,838,397 in 1910 ; £1,653,113 in 1909 ; £1,642,660 in 1908 ; and £1,613,776 in 1907. The export of aerated waters was estimated at £277,179 in 1911 as compared with £239,110 in 1910 ; £230,016 in 1909 ; £223,936 in 1908, and £252,667 in 1907.

Among sundry food stuffs, the chief items are biscuits and confectionery. The value of the imports of biscuits in 1911 was estimated at £117,415 as compared with £106,707 in 1910 ; £100,080 in 1909 ; £84,741 in 1908 ; and £86,038 in 1907. The value of the exports of biscuits is much larger than the imports, and has shown a steady increase from £338,290 in 1907 to £355,348 in 1908 ; £388,724 in 1909 ; £487,157 in 1910, and £507,777 in 1911. In the returns under the head of confectionery the value of the imports is much greater than the exports, and increased from £339,901 in 1907 to £346,049 in 1908 ; £392,582 in 1909 ; £466,155 in 1910, and £510,180 in 1911. The value of the exports of confectionery in 1911 was estimated at £125,317, as compared with £121,792 in 1910 ; £102,489 in 1909 ; £96,364 in 1908 ; and £96,760 in 1907.

In order to furnish the means for comparing (1) the exports of agricultural produce from Ireland with (2) the imports of similar products from colonial and foreign countries into the United Kingdom, a table is presented as Appendix II. showing for the year 1911 the quantities and values of the chief articles of agricultural and horticultural produce imported into the United Kingdom* from British possessions and foreign countries and the corresponding quantities exported from Ireland to Great Britain.

*At present (excepting certain specified articles) the quantities and values of foreign and colonial goods imported are known for the United Kingdom only. Nothing beyond an estimate can be formed as to how far these goods are imports for consumption in Great Britain and how far for consumption in Ireland. For though the import of goods from Great Britain to Ireland is known, it cannot be said how far these goods are foreign or colonial and how far they are British produce. Thus in the case of butter, bacon, and eggs, it is known that the imports from Great Britain into Ireland are of foreign or colonial origin, and a close estimate could therefore be

This table will bring home to Irish producers and exporters the extent of the existing market in Great Britain, and the present strength in that market of the several competitors, while at the same time it shows the very important position which Ireland at present holds in the British market.

Thus in 1911 :—

(1) The value of the Irish export of all classes of live stock was more than three times as large as the value imported into the United Kingdom from all foreign and colonial countries. In connection with this matter it is worthy of note that the export of horses from Ireland amounted to 31,710, and if from this figure is deducted even the total number of horses imported into Ireland, there remains a net export of 26,288 horses. The total number of horses imported into the United Kingdom from all foreign and colonial countries amounted in 1911 to 11,528, of which 6,760 came from Russia. Again in the case of cattle, the number exported from Ireland to Great Britain was 695,529 in 1911, while the total import from foreign and colonial countries into the United Kingdom amounted to 200,398, a decrease compared with 1910, of which number 155,817 came from the United States and 42,239 from Canada.

(2) The Irish export of butter, value £3,671,264, to Great Britain was the third largest in quantity and value ; the export from Denmark into the United Kingdom being first, value £10,527,666, and that from Australia second, value £4,604,284.

(3) The Irish export of eggs was second largest in total quantity and value, amounting to 6,488,776 gt. hnds., valued at £2,940,227, the imports into the United Kingdom from Russia being the largest, amounting to 10,041,890 gt. hnds., valued at £3,796,408.

(4) The export of poultry from Ireland was much greater than that from any other country into the United Kingdom, Ireland exporting to Great Britain poultry to the value of £850,926, while the values of the highest imports from other countries to the United Kingdom were—from Russia, £404,994 ; United States, £137,469 ; and France, £116,267.

(5) As regards bacon and hams, the Irish export, value £3,493,839, was third on the list, the largest supplies coming from the United States of America, value £7,779,820, and from Denmark, value £6,696,483. The imports from Canada took fourth place at a value of £1,991,470.

made of the net import of these commodities from colonial and foreign countries for consumption in Great Britain and in Ireland respectively. But in the case, for example, of flour much of the very large import from Great Britain into Ireland may be foreign, or it may be British milled flour made from foreign or from British wheat, and with most of the other articles the question is even more difficult. At present, therefore, it is not possible to show the foreign and colonial imports into Great Britain alone, or to furnish an exact comparison between the imports into Great Britain of Irish produce and colonial and foreign produce respectively.

(6) The Irish export of potatoes was the largest quantity imported into Great Britain. It exceeded by over 410,000 cwts. the total imports from all other countries. The next largest quantities were imported from the Channel Islands and France, but as their trade is chiefly in early potatoes, the value is much greater than that of the Irish export.

(7) As regards oats, the export from Ireland was fifth, Russia, Argentina, Canada and Germany being the largest exporters to the United Kingdom.

The above cases are sufficient proof of the very strong position which Ireland holds in the markets of Great Britain, and as these are the great open markets of the world for agricultural produce, the figures bring out plainly the wide and representative character of Irish agricultural exports.* This consideration should, therefore, be kept in mind when comparisons are made between the export of particular commodities from Ireland and the corresponding export from any other country, such as the butter export of Denmark and that of Ireland. Thus, in the case of Denmark, which is frequently compared with Ireland, the total exports of home produce and manufacture to all countries in 1911 amounted to £29,585,208† of which £26,519,570 consisted of agricultural produce. The chief articles of export were butter, £10,708,985, pig produce, £6,705,885; eggs, £1,638,614, horses and foals, £1,135,664; cattle, £2,298,603. Over three-fourths of the Danish agricultural exports are sent to the United Kingdom. These figures present interesting contrasts with the present Irish agricultural exports, and bring into relief the more highly diversified interests which Ireland has as a country of production and export. Apart from Denmark, it is noteworthy that the country which is and promises to be the most serious competitor with Ireland in the British market, as regards the important articles of butter, eggs, and poultry, is Russia, the export from that country in 1911 amounting to, in butter, 638,284 cwts., valued at £3,312,569; eggs, 10,041,890 gt. hnds., valued at £3,796,408; and poultry, valued at £404,994.

II. RAW MATERIALS.

For the purposes of the broad classification adopted in the summary tables, pp. x. and xi., raw materials include coal, coke, rough and sawn timber, boards and deals, stones, slates, sand, clay, metal ores and other mineral substances, hides, skins, horns and hoofs, wool, bristles, feathers, flax, raw cotton, hemp, jute, tow, waste, seeds, plants and bulbs, ice, &c. The total value of raw materials imported into Ireland in 1911 was estimated approximately at £9,605,879, as compared with £9,694,926 in 1910. The imports consist mainly of coal, wood, flax, and other raw materials of the textile industries. There is also a large import of raw cotton, which is re-exported to Northern Europe.

*Irish export values are f.o.b., and thus do not include cost of transit from Irish Ports to British market centres; whereas foreign and Colonial imports are c.i.f., and thus include transit costs. This difference makes the total foreign values, *e.g.*, of eggs, butter, etc., appear somewhat higher relatively to the Irish than they actually are.

†This and the following figures in this paragraph are taken from the Danish Official Statistics, and are f.o.b. They are, therefore, more strictly comparable with the values of the Irish exports.

The exports in 1911 were estimated at a value of £4,121,213, as compared with £4,155,657 in 1909. Excluding the re-export of raw cotton, these consist mainly of animal produce, such as hides, skins, wool, fats, &c., and, to a lesser extent, of seeds, timber, and other vegetable produce.

The estimated values of the chief imports of raw materials in 1907—1911 were as follows:—

IMPORTS.

—	1907.	1908.	1909.	1910.	1911.
	£	£	£	£	£
Coal,	2,837,825	2,826,940	2,577,398	2,778,044	2,770,064
Slates,	89,363	89,087	144,898	139,904	120,574
Timber,	1,357,366	1,185,950	1,360,665	1,841,204	1,735,953
Flax,	1,914,328	1,381,479	1,912,667	1,867,372	1,955,355
Hemp and Jute, Tow and Codilla, ..	597,142	548,696	522,847	554,369	550,731
Lard, Tallow, &c., ..	327,478	330,494	471,265	376,051	269,996

The values of the chief exports in the same years were:—

EXPORTS.

—	1907.	1908.	1909.	1910.	1911.
	£	£	£	£	£
Timber	278,716	237,173	245,022	240,851	251,452
Hides and Skins, ..	524,649	486,754	614,106	610,622	596,577
Wool,	611,813	407,024	747,320	631,197	575,173
Lard, Tallow, &c., ..	479,672	494,695	625,978	507,980	412,028
Grass Seed,	349,073	368,866	403,070	371,570	371,388

In connection with the above figures it should be stated that the imports of wood and timber, estimated in 1911 at a value of £1,735,953, consist mainly of sawn timber, boards and deals, whereas 90 per cent. of the exported timber is shipped out of the country in the round or rough state—an uneconomic condition of affairs. The large export likewise, of hides and skins, amounting in 1911 to £596,577, should be compared with the imports of leather and leather goods, boots, shoes, saddlery, &c., which approximate a value of £2,300,000 of goods imported. Again, there is a very great export of wool, which amounted in 1911 to the large quantity of 13,305,208 lbs., of an estimated value of £575,173. It is estimated that over three-fourths of the total wool clip in Ireland is exported, and, while the output of the woollen industries in Ireland is also rising, the imports of woollen goods remain largely in excess of exports. Thus it is not simply in one branch, but in several—in wood, hides and skins, wool, as well as in various minor exports, such as feathers, kelp, and most of all in her store cattle—that Ireland is exporting the raw materials of industry.

III. MANUFACTURED ARTICLES.

The third division of Irish imports and exports is that of manufactured goods. In 1911 these represented an import the total value of which is estimated at, approximately, £33,000,000, or 49 per cent. of the total value of imports. The export of manufactured goods was estimated, approximately, at £27,000,000, or over 41 per cent. of the value of the total export. But to a greater extent than in the case of the imports and exports of either agricultural produce or raw materials the figures indicating the value of manufactured articles must be taken as only approximate in character. For while the existing returns indicate the actual gross weight and quantity of manufactured articles imported and exported, there is great difficulty in determining what is the quality and value of these goods, especially in the case of the more highly differentiated articles. So far as is at present possible, the estimated values have been checked by means of wide and careful inquiries among importers and exporters, through whose courtesy in many cases exact data regarding the gross weight and value of representative consignments of goods have been obtained; but it cannot be too plainly said that until import and export returns are available, which specify the nature, quantity, and value of goods, any figures put forward with regard to the import and export value of manufactured articles can only be regarded as approximate in character.

At the same time it should be clearly understood that the present returns are not arbitrary statements, that they are based on actual figures of weights of goods imported and exported, and on careful inquiries as to value, and that they furnish as close an estimate as is at present possible of the extent and character of this class of Irish trade.

As there is a wide range of manufactured imports and exports, these have been divided, as in the previous Reports, into a number of main groups.

The first and largest group is that of the textiles. The combined imports and exports of manufactured textile goods amounted to a value estimated in 1911 at £35,441,442 as compared with £35,821,255 in 1910, £32,239,308 in 1909, £25,829,080 in 1908, and £29,116,674 in 1907, a sum almost three-fifths of the total value of manufactured imports and exports of Ireland, and which is over one-fourth of the total estimated value of all goods imported and exported to or from Ireland in the year 1911. This fact alone indicates the great importance of the textile group of manufactured goods. The combined textile imports—yarns, piece goods, and made-up goods—amounted in 1911 to an estimated value of £15,684,490, as compared with £15,730,952 in 1910, £14,793,765 in 1909, £12,268,791 in 1908, and £13,335,675 in 1907, while the corresponding textile exports showed an estimated value of £19,756,952 in 1911, £20,090,303 in 1910, £17,445,543 in 1909, £13,560,289 in 1908, and £15,780,999 in 1907.

Distinguishing yarns, thread, rope, cordage, &c., from piece goods and made-up goods, the value of the imports of
Yarns, Thread, the former was in 1911 estimated at £1,986,452 as
Rope, etc. compared with £1,882,847 in 1910, £2,265,312 in 1909, £1,737,381 in 1908, and £1,720,178 in 1907.

In this amount the chief items were cotton yarn £612,535; linen yarn, £604,737; woollen yarn, £279,872; and yarns unclassified (which inquiry shows to contain a large amount of woollen yarn), £153,190. There was also an import of thread, estimated at a value of £190,586. The value of the corresponding exports of yarn, thread, rope, twine, cordage, &c., was estimated in 1911 at £2,735,387 as compared with £2,645,990 in 1910, £2,160,556 in 1909, £2,026,946 in 1908, and £2,656,906 in 1907. Of this amount the main items were—linen yarn, £1,629,859; thread, £537,256; rope, cordage, and twine, £439,840.

Much the largest part, however, both of textile imports and exports consists of piece goods, ready-made goods, drapery, and apparel. The imports of these
Piece Goods,
Drapery, etc. were estimated in 1911 at a value of £13,698,038 as compared with £13,848,105 in 1910, £12,528,453 in 1909, £10,531,410 in 1908, and £11,615,497 in 1907, and the exports at a value of £17,021,565 in 1911, as compared with £17,444,313 in 1910, and £15,284,987 in 1909.

The imports of piece goods, drapery, apparel, &c., are of a much more wide and varied character than the exports. The largest import is of drapery and apparel, the combined value of which was estimated at £5,577,614 in 1911 as compared with £5,860,083 in 1910, £5,653,474 in 1909, £4,897,223 in 1908, and £5,547,790 in 1907. The import of cotton goods was greater than in 1910, and was estimated at a value of £4,688,668 as compared with £4,657,439 in 1910; £3,980,367 in 1909, £2,985,704 in 1908, and £3,292,542 in 1907. The imports of woollen goods, including blankets and carpets, were estimated at £1,390,203 in 1911 as compared with £1,364,155 in 1910, £1,182,830 in 1909, £1,129,194 in 1908, and £1,130,997 in 1907. Altogether, apart from drapery and apparel, the quantities of cotton, linen, woollen, and silk goods imported in 1911 were estimated to amount to a sum of, approximately, £7,537,000. In the case of cotton goods imported, a considerable quantity is imported for purposes of further manufacture, and is then re-exported.

In addition to the above classes of finer textile fabrics, there are large imports of coarser stuffs, such as bags and bagging, oilcloth and canvas goods. The total value of textile goods imported in 1911, excluding yarns, &c., is thus estimated, as stated above, to amount to £13,698,038.

In the case of exports, the outstanding feature is the fact that three-fourths of the textile piece goods exported are returned as "linens," but this term in the returns of the portal authorities has a wide significance, and includes "unions" and goods which have only a linen "finish." The estimated value of exports of linen goods amounted to £12,584,884 in 1911 as compared with £13,342,998 in

1910, £11,996,663 in 1909, £8,508,107 in 1908, and £9,904,703 in 1907. The returns show a decrease in the value of the exports of woollen goods from £617,436 in 1910 to £604,528 in 1911, and imports are still largely in excess of exports. The total value of the exports of piece and made-up textile goods was estimated in 1911 at £17,021,565.

The second group is that of leather and leather manufactures. Attention has already been drawn to the very large export of hides and skins, and the still greater import of leather, saddlery, boots and shoes. The exports of hides and skins in 1911, apart from the hides and skins of the live stock exported, amounted to an estimated value of £596,577, as compared with £610,622 in 1910. On the other hand, the import of leather was of a value estimated in 1911 at £507,229, as compared with £462,586 in 1910, £599,321 in 1909, £531,933 in 1908, and £495,795 in 1907, and the imports of boots and shoes were of a value estimated at £1,734,192 in 1911, as compared with £1,884,317 in 1910, £1,791,908 in 1909, £1,750,937 in 1908, and £1,728,178 in 1907. In addition to these sums there are the imports of saddlery, of leather belting, and of an item which is considerable but which cannot be ascertained from the existing returns, leather and kid gloves. Thus the total imports of leather and of leather manufacturers in 1911 may be estimated at, approximately, £2,300,000.

Large quantities of india-rubber goods are also imported, but it is very difficult to determine the extent and value of this import. The value is estimated at £387,473 in 1911, as compared with £343,985 in 1910, £340,885 in 1909, £374,096 in 1908, and £311,863 in 1907.

The third group is that of metals and metal articles, machinery, ships, &c. This group is a very wide class, and in gross annual value is next in importance to the textiles. It is estimated that in 1911 the total value of the imports of metals and metal manufactures reached almost £8,000,000, while the exports, which include the export of steam vessels, were estimated at £5,651,242. Among the metal imports, approximately, £2,018,000 consisted of steel, bar and wrought iron, and plates and sheets, imported chiefly into Belfast, while anchors and chains, bolts, rivets, nails and screws, rails, iron chairs, and other railway plant, represent a further import estimated at, approximately, £324,000. Thus the more simple articles of iron and steel manufactures represent a total import in 1911 of £2,978,000. Of the other metals, the import of copper was estimated in 1911 at £154,904; lead at £92,426, brass and bronze at £61,380. With regard to the more highly manufactured classes of goods, the returns show very large imports of hardware utensils and implements, as well as of the heavier iron goods, such as ranges, stoves, meters, pumps, boilers and cylinders. The total value of these and similar articles in 1911 was estimated at £1,802,306. In addition, there are imports of machinery, chiefly agricultural and textile, and railway engines, estimated at £1,342,608, and of cycles and motor cars, estimated at £495,500.

As regards exports, considerable quantities of machinery are shipped from Belfast, while the export of steam vessels is of a very large annual value, estimated in 1911 at, approximately, £4,450,000. Thus there are large individual exports in this class, but as a whole the trade in hardware and metal goods and manufactures stands in contrast to the textile trade. For whereas the value of the textile exports appears even greater than that of the imports there is a very large surplus of metals and metal manufactures imported over what is exported.

Of wooden manufactures also there is a very large import and only a small export. The item of greatest importance among the imports is furniture, though
Wooden Manufactures. there is a difficulty in distinguishing removals of private furniture from what are genuine trade imports and exports. But, taking the total import and total export figures of furniture, the imports exceed in value the exports by a balance of close on £327,000 as compared with £347,000 in 1910. There is also a wide range of other classes of imported articles wholly or partly of wooden manufacture.

There is a very large annual import into Ireland of paper, stationery, cardboard, books and printed matter,
Paper and Cardboard, etc. estimated for the year 1911 at a total value of £1,155,603 as compared with £1,107,618 in 1910, £1,085,401 in 1909, £1,093,404 in 1908, and £1,062,213 in 1907. The estimated value of imported paper in 1911 was £573,722; stationery, £205,214; showcards, strawboards, &c., £178,809; books, approximately, £90,000. The exports of paper, cardboard, books, &c., in 1911 were estimated at £366,273 as compared with £353,536 in 1910, £356,668 in 1909, £357,126 in 1908, and £322,939 in 1907. The excess of imports over exports in paper, stationery, cardboard, &c., is thus very large, amounting in 1911 to an estimated value of over £789,000, and in 1910 to over £754,000, and is one of the features of Irish trade which deserve particular attention.

Another class of imports which reaches a considerable annual value is that of the manufactures of clay, china, and glass goods. The total value of the imports
Earthenware, China Goods, Glass and Cement. of these goods was estimated in 1911 at £928,294 as compared with £873,047 in 1910, £846,531 in 1909, £812,002 in 1908, and £884,644 in 1907. In 1911 the import of bricks and tiles was estimated at £73,319; fire-clay, earthenware, and china goods at £268,114; glass, glassware, and bottles at £381,416; cement at £205,445. The contrast between the large import of these various classes of goods estimated at £928,294, and the export, estimated at £23,441, is very striking.

A further group of articles of great interest is that of chandlery, including under this heading such goods as
Chandlery. candles, soap, starch, matches, oils, paints, polishes, &c. Many of these articles are being manufactured in Ireland, and to some extent exported, but in this

class of goods also there is a very considerable excess of imports over exports. The articles to which attention may be specially directed are as follows:—In 1911, candles imported, £89,119; exported, £5,035; soap imported, £230,537; exported £50,454; starch imported, £64,839; exported, £5,391; paints and varnish imported, £252,976; exported, £23,115; matches imported, £92,210; exported, £1,179. There is also a very large import of oils, chiefly petroleum and paraffin, estimated in 1911 at £1,033,568. Altogether this class of goods represents in 1911 an import of a value estimated at £1,919,691, the exports being estimated at £154,173.

The total value of chemicals, drugs, fertilisers, and dye stuffs imported in 1911 is estimated at £1,195,459, as compared with £1,209,538 in 1910. In the case of drugs and chemicals, goods of this class are frequently sent in small consignments, and the figures submitted in the tables, both of quantity and value, are in all probability considerably lower than the actual quantities and values imported. As regards artificial fertilisers, there is a large import, the estimated value in 1911 being placed at £655,460. There is also a considerable export, estimated in 1911 at £145,519. Dye stuffs imported in 1911 were of a value estimated at £38,130.

The above analysis indicates briefly the extent and character of Irish trade. With regard to the question of the source or “country of origin” of the imports and the final destination of the exports, as stated in previous Reports, the existing returns furnish little information. The trade which passes directly between Ireland and colonial and foreign countries is known, and the more important details as regards this trade at the chief ports in Ireland are presented annually by the Customs and Excise Department in their Statement of the Trade of the United Kingdom. The direct imports of foreign and colonial goods into Ireland during 1911 amounted to a value of £15,008,395, whereas the direct exports amounted to £1,631,947, of which £857,975 consisted of re-exports of foreign and colonial goods. But as regards the indirect colonial and foreign trade of Ireland which passes to and from the Irish ports via those of Great Britain, especially Liverpool and London, there are at present no means of distinguishing this from the colonial and foreign trade of Great Britain. Consequently the total trade of Ireland with countries outside of Great Britain cannot at present be ascertained.

At the same time, after examining carefully the quantities of goods shipped across Channel into and from Ireland, and as a result of inquiries made amongst traders, it is estimated that not more than one-fifth of Irish exports goes to colonial and foreign countries, the other four-fifths remaining in Great Britain; and while it is much more difficult to ascertain what proportion of imports into Ireland are of colonial or foreign origin, it seems probable that at least one-third are articles of such origin, the remaining two-thirds being the produce of Great Britain.

With regard to the total extent of the Irish import and export trade, the imports per head of population, according to the present returns, amount to £15 5s. 1*d.*, and the exports per head of population to £14 18s. 1*d.*; or if the estimated value of re-exports is excluded, the imports amount to a value of £14 13s. 8*d.* per head of population, and the exports to £14 6s. 8*d.* per head of population. It is of interest to compare these amounts with the corresponding figures of the foreign trade of the chief industrial States as shown in the following table:—

STATEMENT showing for the year 1911, or latest available year, the estimated Population and the Value per head of Population of the Foreign Trade of the undermentioned countries:—

COUNTRY.	Estimated Population.	Thousand £'s (000's omitted.)		Imports per head of Population.	Exports per head of Population.
		Total Imports for Home Consumption.	Total Exports of Domestic Produce.

* Excluding re-exports estimated at £2,500,000.

As has been pointed out in preceding reports these figures indicate the wide difference which there is in the extent of foreign trade of different countries as measured per head of population. In some States, especially those of wide area and varied climatic conditions, the extent of foreign trade in proportion to the total production of the country is small. Thus it is that the United States of America, with a very great internal trade, has, per head of population, a small foreign

trade ; thus also Germany, with its great agricultural and industrial capacity for production, has a comparatively limited foreign trade per head of population. In all such cases increase or decrease in imports or exports is a very subordinate factor in the industrial progress of the country, and the growth of wealth depends chiefly on internal development and internal trade, and not on the exchange of commodities with other nations. On the other hand, countries which are small in size and with good maritime communication have in general a large foreign trade. Thus it is with Denmark, Belgium, and Holland ; thus also with Ireland.

This consideration has a very direct bearing on the question of the present returns. For the larger the foreign or external trade is in proportion to the internal trade, the greater to such a country is the importance of having as full and accurate as possible a record of this external or foreign trade. The necessary data available on which to form a complete estimate of the total annual production of agriculture and industry in Ireland are not as yet available, but there is evidence sufficient to warrant the conclusion that in proportion to the total annual production and output of the country the external or import and export trade is very large. That being so, it is most important to have as full and reliable a record of this trade as is possible. Such a record is of great industrial and commercial value, and this commercial purpose is the main value of trade statistics such as are submitted in the present Report. As regards the wider inferences of national gain or loss, these require the evidence of much more complete data.

The references in the Consular Reports to Irish trade in 1911 have been brought together as in the Reports for the years 1905, 1906, 1907, 1908, 1909 and 1910 and are reprinted in the first Appendix. They represent the references to be found in the Consular Reports published since the last issue of this Report. A table has also been included in this Appendix showing the imports from Ireland into the United States of America, and the exports from the United States to Ireland for the year ended 30th June, 1911. These figures were abstracted from tables 3 and 6 of the Annual Report on Commerce and Navigation of the U.S.A. for the year 1911, which have been recently issued and which show the trade with Ireland as distinguished from that with England and Scotland. In the second Appendix a table is presented showing the quantities and values of imports of the chief articles of agricultural and horticultural produce into the United Kingdom from British possessions and from foreign countries, and the corresponding exports from Ireland to Great Britain.

Three diagrams are also attached to the Report showing (1) the monthly shipments of fat and store cattle to Great Britain from Ireland, and the monthly arrivals of fat cattle into the United Kingdom from places abroad ; (II.) the monthly export of butter from Ireland and the monthly import of butter from foreign and colonial

countries into the United Kingdom ; and (III.) the monthly export of eggs from Ireland, and the monthly import of eggs from foreign and colonial countries into the United Kingdom.

From the first diagram it will be seen that in 1911 the monthly export of fat cattle from Ireland was the lowest in June and highest in November. The months September, October, and November are those of the heaviest shipments, while April, May, and June are the lowest months. In the store trade the exports from Ireland rose steadily from January to March. In April there was a decline, followed by a rise in May. In June, July, and August the shipments, owing mainly to the Railway Strike and the abnormally dry summer, sunk very low, but from September to November there was a rapid rise. The heaviest shipments of stores were in October and November, the next largest monthly export being in March. In August the shipments amounted to only 7,055. The monthly imports of fat cattle from foreign countries are, on the whole, remarkably even throughout the year. If reference is made to the diagrams included in the reports on the years 1907, 1908 1909, and 1910, the striking similarity between the series of curves showing the monthly exports of fat cattle from Ireland from year to year will be noted, the curves rising and falling at the same periods in each year. A similar uniformity exists in the curves showing the monthly exports of store cattle from Ireland. The corresponding curves of monthly imports of fat cattle into the United Kingdom from abroad not only do not show any such uniformity, but are most irregular.

From the second diagram it will be seen that the Irish export of butter in 1911 reached its height in the month of June. The shipments returned for that month amounted to 105,328 cwts. July was the second highest month of output, amounting to 103,714 cwts., August the third month October and September the fourth and fifth. The point of greatest increase in the output was between the months of May and June, the output for May amounting to 56,505 cwts. only, while for June, as stated above, the amount returned was 105,328 cwts. The comparison of the monthly export of butter from Ireland and the monthly import from Denmark is of very practical interest, especially with regard to the monthly average of Irish Creamery Butter prices indicated by the prices line in the diagram.

From the third diagram, showing the exports of eggs, it will be seen that March, April and May were the months of heaviest export. The output, which rose rapidly from January onwards, fell away again after the month of April, and from May onwards there was a steady decline in the output until December, which marks the lowest point in the year. The fact also that Irish supplies are heaviest in the markets in the months when prices are lowest is plainly shown by a comparison of the lines indicating respectively the movement of prices and the changes in supplies. As in the case of fat and store cattle a remarkable similarity exists in the curves representing the monthly exports of butter and eggs from year to year, and unfortunately in each case the months of largest Irish shipments are usually the months when prices are low, and the months of lowest Irish shipments are the months of highest prices.

In conclusion, I desire to acknowledge gratefully the assistance given by the port and harbour authorities of Ireland, the railway and shipping companies, and by many individual importers and exporters. I am also specially indebted to the Principal of the Statistical Office of the Customs and Excise Department, and to the Comptroller-General of the Commercial, Labour, and Statistical Department of the Board of Trade, for much information which they have kindly afforded.

I am, Sir,

Your obedient Servant,

THOMAS BUTLER,

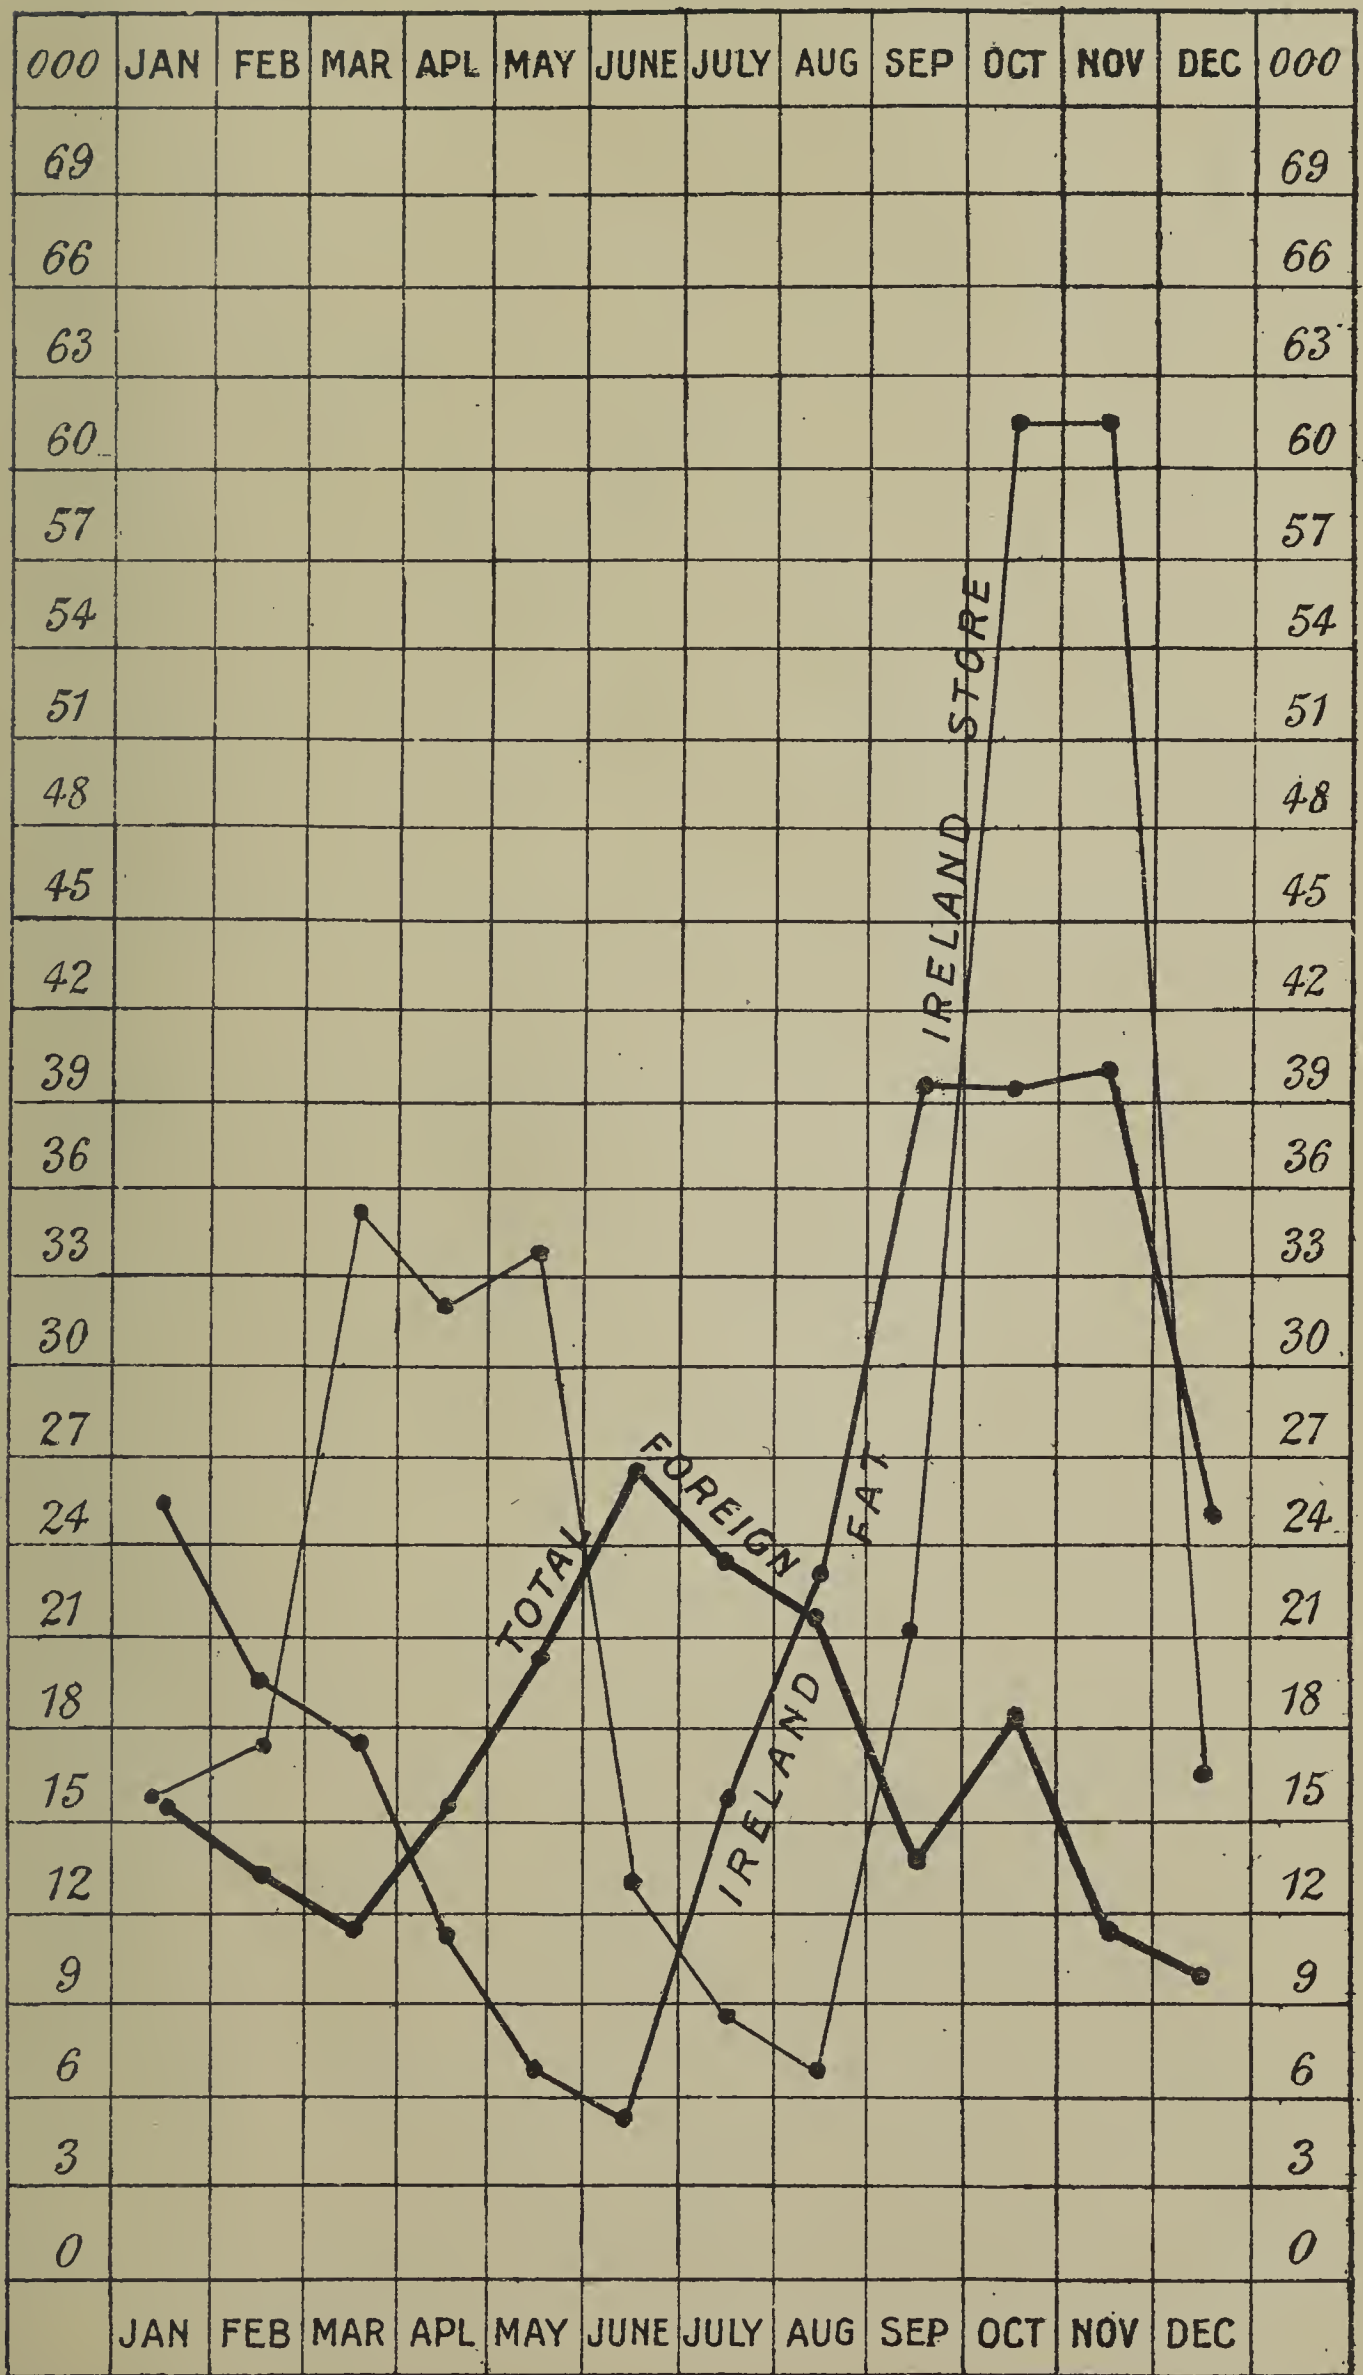

*Superintendent of Statistics and
Intelligence Branch.*

DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND,
DUBLIN, 22nd August, 1912.

TOTAL ESTIMATED VALUE OF IMPORTS AND EXPORTS IN 1904, 1905, 1906, 1907, 1908, 1909, 1910 AND 1911.

APPENDIX I.

Extracts relating to Irish Trade with Foreign Countries, taken from the Consular Reports of the undermentioned Countries :—

A.—FOR THE YEAR 1910 (*continued from previous Report*).

EUROPE.

BELGIUM.

I have always made a point, in these reports on the trade of Belgium, of making special reference to the trade with Ireland, since the time when the statistics of trade were first compiled separately from those of Great Britain. There are several trades in which Ireland has a very close relationship with Belgium, notably the flax and textile industries.

As regards imports from Ireland, the statistics as published in the official returns make very depressing reading, for they show in 1910 a total import trade of only the infinitesimally small amount of 485 tons, having a value of £2,310. These figures compare very badly with the year 1909, when the trade, though even then small, amounted to 1,335 tons, valued at £16,360. Particulars of imports are given in Annex 1.

I cannot help thinking that the quantity and value of Irish goods sent to Belgium during 1910 must have largely exceeded the totals with which they are credited. The figures are so small as to appear absurd, and it is doubtless owing to the fact that most Irish goods sent to Belgium pass through Great Britain and are credited under that heading by the Customs authorities; of course, it is impossible to expect exhaustive inquiries to be made in regard to every consignment of goods entering this country, and if the country of origin is declared to be "England" (the general heading under which the British Isles are often commonly classed on the Continent), and if the goods actually do arrive direct from England, it is very natural to see why the Customs returns should class Irish goods in many instances under the heading of Great Britain instead of under that of Ireland, which is really the country of origin. This is but another instance of the misleading character of tabulated

statistics in regard to the trade of one country with another. I feel certain that the mode of classification is largely responsible for the insignificant totals assigned to the volume and value of Irish trade, and the following is an instance of what leads me to this conviction. I had reason recently to make special inquiries respecting the number of horses purchased annually by Belgium in Ireland. I found that, quite apart from private dealers, the Belgian War Office in 1910 purchased 334 remounts in Ireland at an average price of £40 per head, which gives a total of £13,360. These horses were shipped at Dublin (North Wall) and Greenore, reaching Antwerp viâ English ports. In addition to the above-mentioned, numbers of Irish horses are purchased by private Belgian dealers in Ireland, and many more Irish horses are purchased by Belgian dealers from dealers in England. No mention whatever of this traffic occurs in the Belgian Customs statistics with relation to Ireland, and they are without doubt entered as coming from Great Britain. This being the case in a particular instance in which special investigations were made, it may fairly be concluded that a similar thing happens in regard to many other products of Irish industry sent to Belgium. No blame can be attached to the method of compiling the statistics here, as the customs authorities must of necessity classify goods as coming from the country from which they are declared to emanate, and it is impossible to expect a detailed investigation to be made in each case, especially when the authorities have not even an inkling that any error is being made at the time of classification.

It may, therefore, reasonably be concluded that the figures given in the annexes relating to Ireland do not show a tithe of the real importance of Irish trade with Belgium.

Exports.—As regards exports, the figures furnished are much more likely to be accurate, since exporters to Ireland would gain no advantage from declaring their goods as being exported to any other than their real destination, so that most Belgian goods intended for Ireland are doubtless tabulated in the statistics under their proper heading. There was but small difference between the exports during 1910 and those of the previous year. In 1909 the volume was 31,981 tons, valued at £1,466,560, while in 1910 the volume amounted to 31,385 tons, having a value of £1,555,800. The increase in value is due entirely to the growth of the textile trade, which increased by 1,193 tons and £215,840. The flax trade, however, declined by 1,438 tons and £151,000.

Particulars of the export trade to Ireland are given in Annex 2.

Owing to the fact that no statistics of trade with Ireland during 1911 have yet been published, I am unable to give any particulars respecting the first half of the present year.

GERMANY.

Hamburg.—It is, as in previous years, not possible to furnish statistics of the trade between Hamburg and Ireland, as no special returns thereof are kept at this port.

NORWAY.

The Imports from Ireland into Norway are officially stated to have amounted to about £3,000 in value in 1910, the chief item being rather over £1,000 worth of bleached linen yarn. It is, however, quite possible that Irish-made articles, such as linen and whiskey, find a small market in Norway, but appear as imports from the United Kingdom in the statistics.

RUSSIA.

Warsaw.—Flax is imported from Ireland and spun into yarn locally.

Odessa.—There was no trade between Odessa and Ireland in 1910, except that Irish linen handkerchiefs are imported by parcel post. The quantity cannot be ascertained.

Libau.—The exports to Ireland consisted of 2 tons of bristles, 18,150 cubic feet of ash logs, 111,448 cubic feet of boards and planks, and 35 tons of salt meat. There was no grain or linseed cake shipped to Ireland in 1910.

Pernau.—The quantity of tow and codilla shipped to Ireland was 5,300 tons. There were also 2,814 bags of flax seed, 2,038 tons of wood pulp, and wood goods to the value of £1,100.

Reval.—According to value the imports from Belfast surpass all other British ports, but they do not benefit the Irish produce to any extent as they consist only of cotton. The imports from Ireland in 1910 consisted of about 8,000 tons of cotton, which were received from Belfast. The exports from Reval to Belfast amounted to 5,293 tons, chiefly flax and oil cakes, of which 1,723 and 2,180 tons respectively were shipped.

Riga and Windau.—The following is an extract showing for the years 1908, 1909, and 1910 the quantity of cotton coming into these ports viâ Belfast and Liverpool :—

Article.	Port.	1908.		1909.		1910.		Increase or Decrease in Quantity in 1910 compared with 1908 1909	
		Tons.		Tons.		Tons.	£	Tons.	Tons.
Cotton ..	Riga ..	19,001		9,869		10,024	972,328	— 8,977	+ 155
	Windau ..	3,558		2,191		4	1,904	— 3,554	— 2,187

St. Petersburg.—The import from Ireland was very much smaller than in foregoing years.

SPAIN.

Mazarron.—There is no direct trade between Ireland and this district.

Marbella.—According to the information I have obtained no trade was carried on between Ireland and this district.

Bilbao.—All imports from Ireland are included in customs statistics as coming from the United Kingdom.

AMERICA.

ARGENTINE REPUBLIC.

Rosario.—The trade with Ireland is unimportant. The imports from Ireland consist principally of linen, particulars of which are not obtainable, being included in the Custom House statistics as imports from the United Kingdom.

Buenos Ayres.—There is no special trade with Ireland.

CHILE.

There is no record of any direct trade with Ireland during the past year.

COSTA RICA.

There is no direct trade with Ireland, but merchants occasionally order small quantities of Irish goods through Manchester or London houses. Ginger ale, linen, lace, and glacier window paper are the principal articles of Irish manufacture imported.

PARAGUAY.

No particulars are available to show the trade carried on with Ireland.

UNITED STATES.

Chicago.—The total value of the imports from Ireland in 1910 amounted to £92,469.

New York.—The total value of the exports to Ireland in 1910 was £186,000, and of the imports from Ireland £3,030,000.

PHILIPPINE ISLANDS.

Manila.—No separate returns are made out for Ireland. The chief imports are linen, onions in small quantities, ginger ale and stout.

B.—FOR THE YEAR 1911.

EUROPE.

FRANCE.

Honfleur.—The transit viâ Southampton has been 200 tons of rye-grass and 10 tons of champagne.

Bordeaux.—The following table shows the export of wines and brandy to Ireland during the years 1909, 1910, and 1911 :—

—				---	1909.	1910.	1911.
Wines in Wood		Galls.	6,116	9,856	7,458

Brandy in Wood		„	—	110	—
„ Bottle		„	—	—	—

St. Malo.—There has been no direct trade with Ireland during 1911 except the export hence of a few cargoes of slate.

ITALY.

Marsala.—There were no direct imports from Ireland in 1911. Marsala wine is the only article exported to Ireland direct.

NETHERLANDS.

The following tables show, first the direct imports from Ireland, and second the direct exports to Ireland during the years 1909, 1910, and 1911 :—

Rotterdam.—55 vessels, with a net tonnage of 43,885 tons, left Rotterdam in 1911, direct for Ireland.

SWITZERLAND.

It has not been possible to separate the imports from Ireland, as all goods coming from that country are grouped in the statistics with those from the United Kingdom.

Davos.—There is little trade done in Davos with the United Kingdom, it being represented chiefly by tinned food, Scotch and Irish whiskey, articles of toilet, and other luxuries.

TURKEY.

Beirut.—Nothing except a small quantity of whiskey is imported from Ireland.

AMERICA.

BRAZIL.

Bahia.—No Irish goods are imported as such, though a small amount of stout and ginger ale is consumed, in spite of the enormous import duty.

PERU.

Iquitos.—There was no trade specifically with Ireland during 1911.

UNITED STATES.

Baltimore.—The total value of the imports from Ireland in 1911 was £17,295, and of exports to Ireland during the same period £577,164. Totals only can be given, as the various classes of goods are not specified.

New York.—The total value of the imports from Ireland in 1911 was £147,000, and of exports to Ireland, £2,763,000.

Chicago.—The values of the principal commodities imported from Ireland in 1910 and 1911 were :—

	1910.	1911.
	£	£
Linens	49,663	68,820
Handkerchiefs, laces, &c. .. .	13,654	22,033
Spirits	9,288	10,984
Mackerel, salt	2,190	9,231
Ginger ale, &c.	6,653	8,515
Beer	5,404	7,277
Cotton goods	3,827	3,850

Milwaukee.—The total imports from Ireland in 1911 was small, being only £2,830, as against £6,921 for the previous year. The chief items were calf-skins, £1,340, and linen cloth, £786.

Detroit.—The total value of the exports to Ireland was £23,462.

St. Louis.—14,264 barrels of flour were exported direct to Ireland in 1911.

Boston.—Owing to the failure of the potato crop large quantities of potatoes have been imported from England, Scotland, and Ireland, and there will be a continued demand until next year's crop is available.

The following tables (pp. 120-128) extracted from publications issued by the Bureau of Statistics, Washington, show the imports and exports into and from Ireland from and into the United States during the twelve months ended 30th June, 1911. The tables, however, do not cover the whole trade between Ireland and the United States. Goods manufactured or produced in Ireland, sold to firms in England, and by them exported to the United States, are, as a rule at least, accredited in the reports of the Bureau to England and not to Ireland.

**TOTAL VALUE OF TRADE BETWEEN IRELAND AND THE UNITED STATES
DURING TWELVE MONTHS ENDED 30TH JUNE, 1911.**

DUBLIN CASTLE,

13th August, 1913.

SIR,

I have to acknowledge the receipt of your letter of the 12th instant (G. 2984-13), forwarding, for submission to His Excellency the Lord Lieutenant, the Report on the Trade in Imports and Exports at Irish Ports during the Year ended 31st December, 1912.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,

Department of Agriculture

and Technical Instruction,

Dublin.

REPORT ON THE TRADE
IN
IMPORTS AND EXPORTS AT IRISH PORTS
DURING THE YEAR 1912.

TO THE SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Ninth Report on the Trade in Imports and Exports at Irish Ports during the year ended 31st December, 1912.

The inadequacy of the present system of returns upon which these Reports are based and the importance of this consideration has been fully dealt with in previous Reports.

In the tables and figures herewith submitted, as explained in previous issues in this series of Reports, Irish imports and exports mean all goods imported or exported by Ireland, whether from or to Great Britain, the Colonies, or foreign countries—the terms including not only the colonial and foreign trade, but also the Cross-Channel trade between Great Britain and Ireland. The import and export trade is thus the sum of three things: (1) the direct trade between Ireland and all other countries outside of Great Britain; (2) the indirect trade of Ireland with these same countries *via* Great Britain; and (3) the local trade between Ireland and Great Britain.

As a result of inquiries which have been carried on each year since the figures for 1904 were published, an estimate more nearly approaching accuracy can now be made regarding the values of certain classes of produce imported and exported during those years. In all such cases the figures have been revised.

Revision of Figures
published in previous
Reports.

The total import and export trade at Irish ports in 1912 is estimated at £140,765,637 as compared with £131,951,809 in 1911, an increase of £8,813,828. The imports amounted to a total of £73,139,119 and the exports to a total of £67,626,518. The increase in the estimated value of the trade in 1912 as compared with 1911 has taken place both in imports and exports, the increase in imports amounting to £6,414,121, and in exports to £2,399,707. The following statement shows the total estimated values of imports and exports in the nine years 1904–1912 :—

				Imports.	Exports.	Total.
				£	£	£
1904		54,460,182	49,784,760	104,244,942
1905		56,148,247	51,392,547	107,540,794
1906		57,908,545	56,005,303	113,913,848
1907		62,116,918	59,159,532	121,276,450
1908		59,295,508	57,414,977	116,710,485
1909		64,218,664	61,046,365	125,265,029
1910		65,458,186	65,995,405	131,453,591
1911		66,724,998	65,226,811	131,951,809
1912		73,139,119	67,626,518	140,765,637
1912 over 1904		18,678,937	17,841,753	36,520,695
„ „ 1905		16,990,872	16,233,971	33,224,843
„ „ 1906		15,230,574	11,621,215	26,851,789
„ „ 1907		11,022,201	8,466,986	19,489,187
„ „ 1908		13,843,611	10,211,541	24,055,152
„ „ 1909		8,920,455	6,580,153	15,500,608
„ „ 1910		7,680,933	1,631,113	9,312,046
„ „ 1911		6,414,121	2,399,707	8,813,828

It will be seen that the values of imports have shown an increase each year since 1904, with the exception of the year 1908, and the exports have shown an increase each year, with the exception of the years 1908 and 1911.

From these figures it will be seen that the trade in 1912 shows a great improvement on 1911, and exceeds the records of any of the preceding years. In considering, however, the increases or decreases in trade it should be borne in mind that the rise or fall in the total value is to a considerable extent due to the rise or fall in the prices of commodities. In recent years—in fact since 1896—there has been a marked upward tendency in prices, and considering in particular the period from 1904 to 1912 it appears that prices fell in 1905, rose in 1906 and 1907, fell in 1908, and increased again in 1909, 1910, 1911, and 1912. Accordingly, although the total value of the import and export trade of Ireland has increased in a most satisfactory manner since 1904, the increase in the *volume* of the trade has not been so great. This latter increase may be measured by assuming that prices have remained the same in each succeeding

year as in 1904. If prices had remained the same as in 1904 the increases in the total values of imports and exports in 1912 over the preceding years would have been :—

1912 over 1904	£14,748,160	instead of	£36,520,695
„ „ 1905	11,925,738	„	33,224,843
„ „ 1906	8,940,582	„	26,851,789
„ „ 1907	6,331,373	„	19,489,187
„ „ 1908	9,356,389	„	24,055,152
„ „ 1909	5,671,699	„	15,500,608
„ „ 1910	3,356,649	„	9,312,046
„ „ 1911	3,328,188	„	8,813,828

If the years 1911 and 1912 are compared, the increase in the value of imports would have amounted to £2,929,041 instead of £6,414,121, and the increase in the value of exports to £399,147 instead of £2,399,707.

It will also be remembered that the figures in the tables of imports and exports include not only articles imported for home consumption but also consignments which have been returned or re-exported without going through any process of manufacture, as with the present restricted means of information it is not possible to distinguish imports or exports from what are strictly speaking returned exports or returned imports. But, as has been pointed out in previous reports, this trade is a small proportion of the total Irish trade. In the case of certain articles such as tea, coffee, sago, it is evident that the quantities exported represent re-exports, which it may be assumed have undergone no change, and are either being returned or in certain cases re-distributed. In respect of other articles, however, such as leather, apparel, machinery, etc., it is a matter of considerable difficulty to ascertain, even approximately, the proportion of (a) goods which are re-exports or returned goods, (b) goods which having been imported and having undergone some process of manufacture are then exported, and (c) goods which are largely or wholly the product of Irish industry. Making as careful an estimate as existing information permits it would appear that in 1912 goods to the value of approximately £2,700,000* may be taken to have been returned or re-exported without undergoing any process of manufacture. Deducting this sum from the totals of imports and exports respectively it leaves in 1912 for the purposes of Irish consumption and manufacture a net total import of approximately, £70,439,119, and a net Irish export of approximately, £64,926,518, the total Irish trade, excluding re-exports, amounting in 1912 to £135,365,637. The corresponding figure for 1911 was £126,951,809. The re-imports are small.

*The main articles contributing to this total figure are :—Wines, foreign and colonial spirits, guns and rifles, butter, chemicals, dyes and tanning substances, glass and glassware, maize, hops, Indian meal, rice, sago, etc. ; boots and shoes, indiarubber goods, musical instruments, machinery and hardware, oils, paints, sponges, sugar, tea, raw cotton, piece goods, haberdashery, unmanufactured tobacco. The largest re-export is raw cotton, almost all of which was shipped from Belfast, the value re-exported in 1908 being £1,473,771 ; in 1909 £1,243,495 ; in 1910, £904,032 ; in 1911, £917,799 ; and in 1912, £927,867.

In order to indicate briefly the main divisions of the trade the preceding summary has been adopted, showing
Summary respectively the various classes of (I) farm pro-
of Trade. duce, food and drink stuffs, (II) raw materials,
and (III) manufactured goods. Any such classi-
fication has drawbacks. There are certain goods which might
be placed in one class or another. Thus hides and skins, wool, flax,
etc., which are farm produce, are classed under raw materials, Thus
also a number of articles in the first group, *e.g.*, butter, bacon, wines,
ales, spirits, tobacco, etc., have undergone varying degrees of manu-
facture and might be classed as manufactures. But the present
division is simple, well known, and of practical interest, and with
the particulars set forth in the accompanying tables it is easy to
re-arrange the groups for other purposes of comparison as may be
required.

These summary tables show that the percentages of the three
classes which make up the total values of imports and exports were
in 1912 as follows :—

	IMPORTS.	EXPORTS.
(I) Farm Produce, Food and Drink Stuffs	36	52
(II) Raw Materials	15	7
(III) Manufactured Goods	49	41
Total ..	100	100

It will be seen from the summary tables that in the year 1912
there was an increase in the total value of the commodities in each
of the three divisions both as regards imports and as regards
exports.

Following the classification in the above summary attention is
directed to the main groups and the articles of chief importance in
them.

I.—FARM PRODUCE, FOOD AND DRINK STUFFS.

The group of farm produce, food and drink stuffs represents
an import and export amounting in 1912 to £61,268,084 out of a
total of all imports and exports estimated at £140,765,637. It is
important to note that a very large proportion of even the imports
into Ireland consist of agricultural produce :—bacon, eggs, poultry,
butter, grain, flour, food stuffs, fruit, and vegetables. And if to these
articles are added flax, hides, wool, skins, etc., which are included
under raw materials, the total import of farm produce alone reaches
over £22,000,000, marking an increase on the preceding year in
these commodities. This feature of Ireland's trade deserves close
attention, as it is significant that this country with its agricultural
capacity and potentiality should be annually importing so great a
quantity of farm produce, much of which it is admirably suited to
raise at home.

In the case of exports from Ireland, live stock, bacon and hams, butter, poultry, eggs, oats, potatoes, vegetables, and flax, etc., together with the products of the live stock industries, such as hides, skins, wool, feathers, etc., amount to a value altogether approaching £31,000,000 or nearly half the total exports of Ireland. Large as this export is, the fact is seldom realised that Ireland, while exporting annually farm produce and food stuffs to the value of £31,000,000 is importing other food stuffs and farm commodities of a value of over £22,000,000.

The several articles belonging to the large group of farm produce food and drink stuffs are mostly simple in character, and for this reason the quantities and values in this division as also in that of raw materials represent in all probability the actual extent and value of the trade much more closely than is the case with manufactured articles.

The first and still the chief agricultural export of Ireland is that of live stock amounting in 1912 to a total estimated value of £12,326,819, a decrease of over £1,000,000 as compared with the export of 1911, and a decrease of over £3,000,000 as compared with the export in 1910. The decrease in 1912, as compared with 1911, was occasioned by the restrictions on movements of live stock necessitated by the outbreak of foot-and-mouth disease, and it will be remembered that the decrease in 1911, as compared with 1910 and previous years, was mainly caused by the great drought which prevailed in the summer of 1911. The total value of the exports of cattle in 1912 is estimated at £8,288,736 as compared with £9,566,393 in 1911, and £11,453,673 in 1910. The total number of cattle shipped in 1912 amounted to only 555,321, which is the lowest figure on record since 1878, when the published returns of the exports of animals from Ireland were first issued. The shipments of sheep and lambs amounting to only 618,976 in 1912 fell below those of any year since 1889. The number of swine exported only amounted to 265,241, which, as in the case of cattle, is the lowest figure on record.

The number of horses exported showed a substantial increase from 31,710 in 1911 to 34,849 in 1912, the increase in value being estimated at £153,350.

The following statement gives the numbers and estimated values of live stock exported in the years 1909, 1910, 1911, and 1912 :—

	Number				Value			
	1909	1910	1911	1912	1909	1910	1911	1912
					£	£	£	£
Horses, ..	29,365	31,894	31,710	34,849	1,369,395	1,492,015	1,473,690	1,627,040
Cattle—Fat, ..	266,269	260,119	269,966	336,737	4,351,279	4,349,406	4,460,063	5,769,427

Sheep, ..	431,241	348,018	306,312	328,135	830,885	769,812	647,497	723,937
Lambs, ..	443,060	383,684	350,858	290,841	526,134	492,394	437,111	380,517
Total Sheep & Lambs	874,301	731,702	657,170	618,976	1,357,019	1,262,206	1,084,608	1,104,454
Swine, Fat, ..	316,891	301,576	323,574	253,165	1,426,010	1,281,698	1,294,296	1,265,825
„ Stores, ..	10,238	22,495	18,766	12,076	25,595	50,614	37,532	36,228
Total Swine, ..	327,129	324,071	342,340	265,241	1,451,605	1,332,312	1,331,828	1,302,053

Live stock imports into Ireland are very small, the total estimated value in 1912 amounting to £232,814 as compared with £262,436 in 1911. This figure, it should be remembered, includes a considerable number of horses which are temporarily imported chiefly for sporting purposes and which also swell the export returns. The largest import is of sheep and lambs, of which 11,067 were imported in 1912 as compared with 16,824 in 1911, and 38,736 in 1910. A few breeding cattle are also imported.

The exports and imports of dead meat, bacon and hams, game, etc., form also a very important and interesting class. In 1912 the total value of these exports from Ireland was estimated at £5,143,167 while the corresponding imports amounted to £2,496,511. The exports mark a very big increase as compared with 1911, and are much

greater than any year since 1904, while the imports are less than in 1911, but greater than in the year 1910. The following table shows for the years 1909—1912 the total quantity and the estimated total value of each main class imported and exported :—

IMPORTS.

	Quantities.				Values.

Provisions and Groceries (b)	19,697	19,197	20,159	22,080	65,000	67,190	60,477	68,724

There are many interesting points to note in this table. As regards imports it will be seen, first, that in 1912 the total of foreign and colonial beef imported into Ireland showed a decrease in quantity, but an increase in value compared with 1911; second, that there was a falling off all round in the imports of dead meat into Ireland in 1912 as compared with the previous year.

(a) Poultry is not included here.

(b) It is found that under this heading considerable quantities of bacon and hams are exported. Owing to improved returns, many of these quantities formerly returned under this heading are now definitely specified as bacon or hams.

With regard to the exports from Ireland there was a very great increase in 1912 in the quantity of dead meat, as compared with the exports in 1911 and previous years, which resulted from the restrictions on the movements of live stock necessitated by the outbreak of foot-and-mouth disease at the end of June. Up to that date the quantities of dead meat shipped had been normal, but in the later months unprecedented quantities of beef, mutton, and pork, and bacon in particular, were sent from Ireland to Great Britain. The increased slaughterings of animals for export is also reflected in the increased exports of hides and skins and other by-products of the dead meat industry. The total value of bacon and hams exported in 1912 was estimated at £4,220,368, being an increase of £726,529. This total exceeded by £2,378,105 the estimated value of the imports of bacon and hams in 1912. If to this export is added the export of pork and coarse pig meat, the value of the products of the pig exported will amount to over £4,500,000 sterling. It is interesting thus to note that, including the export of live pigs, the total export value of pigs and pig produce in 1912 amounted to a sum of close on £6,000,000 sterling.

The import of preserved and tinned meat increased in 1912 to £149,807 as compared with £143,531 in 1911, and the export of preserved and tinned meat increased from an estimated value of £27,834 in 1911 to £35,829 in 1912. Additional quantities of tinned meat are probably shipped under the name of "Provisions and Groceries."

The returns indicate an increase in the export of poultry as compared with 1911. The estimated value
Poultry. exported in 1912 amounted to £1,037,771 as compared with £850,926 in 1911, £927,035 in 1910, £857,276 in 1909, and £797,376 in 1908. It is estimated that one-third of these values consisted of live poultry.

There was a decrease in the quantity of eggs exported in 1912 as compared with 1911, the total quantity exported
Eggs. being greater than in 1910 but less than in any of the years 1906, 1907, 1908, or 1909. The value in 1912 is only slightly less than that for 1911, which was the highest recorded in these Reports.

The following statement shows the quantities and estimated values of imports and exports of eggs during the years 1904—1912 :—

Year.			Imports.		Exports.	
			Gt. Hds.	Value. £	Gt. Hds.	Value. £
1904	114,192	37,112	5,738,129	2,044,208
1905	116,380	41,218	6,194,132	2,387,322
1906	99,755	37,408	6,494,532	2,604,578
1907	103,107	41,036	6,675,599	2,781,500

1911	97,638	43,512	6,488,776	2,940,227
1912	99,208	45,326	6,313,525	2,926,582

The exports of eggs and poultry together in 1912 amounted to £3,964,353, and if to this is added the export of feathers, amounting in 1912 to £43,340, a total export of £4,007,693 is recorded. These figures do not include the value of the quantity sent by parcel post.*

The imports of poultry and eggs into Ireland are small, amounting in 1912 to £64,890 as compared with £63,456 in 1911. Thus, in estimating the value of the poultry and egg industry to the country, it should be borne in mind that practically the entire home demand is supplied by the home article, and that the export represents the surplus production of poultry and eggs. These facts bring home the great importance and value of the poultry and egg industries to Ireland. Attention is specially directed to diagram II. (see page xxxii.) which shows for the year 1912 (1) the total monthly import of eggs into the United Kingdom from foreign and colonial countries ; (2) the quantity of eggs exported from Ireland each month ; and (3) the monthly average export price of Irish eggs.

In each of the years 1907, 1908, 1909, 1910, and 1911 there was a decrease in the quantity of butter exported as compared with the previous year. This continuous decline ceased in 1912, when a substantial increase took place, the quantity increasing from 688,362 cwts. in 1911 to 778,778 cwts. in 1912, and the value from £3,671,264 in 1911 to £4,159,972 in 1912. The quantity exported in 1912 was greater than in any of the four previous years but was less than in any of the four years 1904 to 1907. It should be noted that the imports of butter, though trifling as compared with the exports mark a very big drop in 1912 as compared with 1911, but are still greater than in 1908 and previous years.

The changes in the quantities and values of butter imported into and exported from Ireland during the period 1904—1912 may be seen from the following table :—

Year.	Imports.		Exports.	
	Quantity.	Value.	Quantity.	Value.
	Cwts.	£	Cwts.	£
1904	59,053	300,924	818,252	3,666,792
1905	57,438	314,234	813,921	4,048,409
1906	60,194	350,128	844,027	4,283,437
1907	63,258	360,571	818,004	4,009,072
1908	62,918	384,287	751,942	4,026,023
1909	68,347	394,867	719,625	3,625,111
1910	77,945	477,798	698,907	3,584,810
1911	88,472	535,207	688,362	3,671,264
1912	65,731	432,555	778,778	4,159,972

* So far as agricultural produce is concerned the parcel post trade is mainly confined to the carriage of butter, eggs, and poultry. Through the courtesy of the Postmaster-General, the Department have been informed that approximately 3,360,000 parcels are posted annually from Ireland to Great Britain that it is estimated that about 1,120,000 parcels are of butter, eggs, and poultry and that the average weight of all inland parcels is 2 lb. 10 ozs. Assuming the export of butter, eggs, and poultry by parcel post to have an average weight per parcel of 3 lbs., the export by parcel post of butter, eggs, and poultry would amount to 30,000 cwts.

As in the case of eggs, these figures do not include quantities sent by parcel post. There is also difficulty in obtaining a record of small consignments of butter under 28 lbs. as these are frequently entered in the returns as "parcels" or "sundries." Attention is directed to diagram I. (see page xxxii.) which shows for the year 1912 (1) the imports of butter into the United Kingdom from the Colonies and foreign countries; (2) the quantity of butter exported each month from Ireland; and (3) the average monthly export price of Irish creamery butter.

The quantity of margarine imported in 1912 amounted to 75,470 cwts., valued at £196,222, as compared with 56,163 cwts., valued at £146,024 in 1911. The exports of margarine amounted to an estimated value of £165,721 in 1912 as compared with £190,245 in 1911.

Margarine.

The returns showed a decrease in the imports of cheese; the quantity imported in 1912 amounting to 42,986 cwts., valued at £137,555 as compared with 46,573 cwts., valued at £142,048, in 1911; 43,560 cwts., valued at £120,879 in 1910; 42,611 cwts., valued at £121,441 in 1909; and 36,159 cwts., valued at £103,053 in 1908. There was a considerable increase in the export of cheese, the quantity exported in 1912 amounting to 10,260 cwts., valued at £32,832 as compared with 6,031 cwts., valued at £18,395 in 1911; 3,365 cwts., valued at £9,338 in 1910; 4,015 cwts., valued at £11,443 in 1909; and 3,231 cwts. valued at £9,208 in 1908.

Cheese.

There was a considerable increase in the export of fish from Ireland in 1912, the total value of fish, including shell-fish, exported being estimated at £915,271 in 1912, as compared with £737,482 in 1911, £633,669 in 1910; £724,476 in 1909; and £440,461 in 1908. The increase was chiefly in the export of cured herrings, shipped mainly from Londonderry and Downings; the quantity of cured mackerel also showing an increase. On the other hand the value of fish, including shell-fish, imported in 1912 was estimated at £281,421, as compared with £298,025 in 1911; £309,613 in 1910; £323,656 in 1909; and £277,431 in 1908.

Fish

In the summary tables on pp. viii. and ix., grain and other foods intended for human consumption have, as far as possible, been distinguished from the feeding-stuffs for animals, as it is important to see the respective amounts of these two kinds of imports. In several cases, however, the imports may be, as in the case of oats or of Indian meal, partly for human consumption and partly for cattle feeding, and therefore this division can only indicate broadly the extent of the two classes of imports.

Grain and Vegetable Produce.

Much the largest import among the grain foods for human consumption is wheat and wheat flour. The quantities and estimated values imported into Ireland respectively in the years 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, and 1912 were as follows :—

	Wheat Imports.		Wheat Flour Imports.	
	Quantity.	Value.	Quantity.	Value.
	Cwts.	£	Cwts.	£
1904	6,932,956	2,599,857	5,529,278	2,764,639
1905	7,502,728	2,907,307	5,596,214	2,798,107
1906	6,927,827	2,439,172	5,399,355	2,521,187
1907	7,147,511	2,829,223	5,261,607	2,652,726
1908	6,764,866	2,931,442	4,697,156	2,563,865
1909	8,233,011	3,979,289	4,513,657	2,595,353
1910	7,997,988	3,532,445	4,602,990	2,685,078
1911	7,839,093	3,233,626	5,001,058	2,625,555
1912	7,471,974	3,300,122	4,775,622	2,586,795

From these figures it appears that the quantity of wheat imported in 1912 was less than in 1909, 1910, or 1911 but greater than in any of the three previous years, but owing to higher prices the total value of the imports in 1912 was estimated to be £66,496 higher than in 1911. The imports of wheat flour also showed a decrease in quantity in 1912 ; the total amount imported was greater than in 1908, 1909 or 1910, but less than in any of the four previous years. In the agricultural statistics of Ireland the amount of Irish-grown wheat in 1912 was estimated at 837,826 cwts., and if it is assumed that one and a-half tons of wheat produce one ton of flour, the total quantity of flour represented by imports of wheat and flour and by home-grown wheat amounted to 10,315,489 cwts. From this quantity has to be deducted an export of flour, or its equivalent in wheat, amounting to 330,091 cwts., leaving thus a residue of 9,985,398 cwts. for consumption in Ireland.

In the case of oats the imports amounted to 545,066 cwts. in 1912, as compared with 335,026 cwts. in 1911 ; 452,597 cwts. in 1910 ; 583,372 cwts. in 1909 ; and 401,095 cwts. in 1908, while the exports amounted to 1,180,033 cwts. in 1912, as compared with 1,358,563 cwts. in 1911 ; 1,175,241 cwts. in 1910 ; 1,249,172 cwts. in 1909 ; and 1,449,111 cwts. in 1908. The imports of oatmeal fell to 164,651 cwts. in 1912, as compared with 172,909 cwts. in 1911 ; 169,358 cwts. in 1910 ; 134,748 cwts. in 1909 ; and 194,798 cwts. in 1908 ; the exports amounted to 106,476 cwts. in 1912, as compared with 111,397 cwts. in 1911 ; 146,526 cwts. in 1910 ; 164,998 cwts. in 1909 ; and 150,044 cwts. in 1908. But, as was pointed out in previous Reports, in considering the imports of oatmeal, allowance must be made for a quantity of what is returned as “meal,” one-third of which is estimated to be oatmeal or similar meals for human consumption, the remaining two-thirds of these unclassified meals being cattle meals. The quantities of “unclassified” meals in the imports which rose from 130,753 cwts. in 1908 to 193,590 cwts. in 1909, fell to 134,986 cwts. in 1910, and again showed a marked increase to 185,547 cwts. in 1911, and advanced to 220,189 cwts. in 1912.

The quantity of barley imported in 1912 amounted to 1,162,584 cwts., as compared with 1,152,323 cwts. in 1911 ; 989,804 cwts. in 1910 ; 1,216,627 cwts. in 1909 ; and 1,181,987 cwts. in 1908. The exports of barley showed a decrease, the shipments amounting to 101,787 cwts. in 1912 ; as compared with 150,499 cwts. in 1911 ; 20,515 cwts. in 1910 ; 211,891 cwts. in 1909 ; and 36,778 cwts. in 1908. The exports of malt fell to 74,111 cwts. in 1912 as compared with 76,890 cwts. in 1911 ; 72,892 cwts. in 1910 ; 161,045 cwts. in 1909 ; and 79,379 cwts. in 1908. The imports of malt amounted to 878,642 cwts. in 1912 as compared with 830,597 cwts. in 1911 ; 735,196 cwts. in 1910 ; 652,872 cwts. in 1909 ; and 808,817 cwts. in 1908.

Among cattle feeding stuffs the chief import is maize, a very great quantity of which is annually imported into Ireland. A considerable quantity, however, is each year re-exported—in 1912 to the value of £213,229. The following are the total quantities and values of maize imported in the years 1904—1912 :—

—				Quantity.	Value.
				Cwts.	£
1904	13,251,493	3,147,229
1905	11,268,018	2,957,854
1906	13,404,190	3,295,197
1907	15,147,026	4,133,876
1908	10,924,929	3,368,520
1909	12,527,450	3,862,630
1910	11,435,688	3,168,639
1911	11,927,375	3,304,877
1912	13,582,134	4,244,417

Together with the above import of maize, the imports of bran, pollard, and the various classes of cattle meals, brought the total value of feeding stuffs imported in 1912 to a sum estimated at £5,637,012 as compared with £4,443,251 in 1911 ; £4,284,055 in 1910 ; £5,007,091 in 1909 ; and £4,417,586 in 1908.

The imports of fruit into Ireland are considerable, being estimated at £800,144 in 1912 as compared with £797,316 in 1911 ; £806,073 in 1910 ; £778,948 in 1909 ; and £699,625 in 1908. The exports of fruit are comparatively small, but the returns do not adequately represent the extent of the trade.

In the case of jams and preserves the imports amounted in value to £225,053 in 1912 as compared with £206,879 in 1911 ; £177,177 in 1910 ; £172,339 in 1909 ; and £147,963 in 1908. The exports amounted in value to £91,757 as compared with £82,514 in 1911 ; £75,230 in 1910 ; £61,879 in 1909 ; and £56,324 in 1908.

Among vegetables the largest import is that of onions, of which 275,001 cwts. were imported in 1912 as compared with 239,187 cwts. in 1911 ; 241,439 cwts. in 1910; 219,706 cwts. in 1909 ; and 223,488 cwts. in 1908. The chief export of vegetables is that of potatoes, of which 171,131 tons were exported in 1912, valued at £513,393, as compared with 183,230 tons in 1911, valued at £641,305 ; 119,870 tons in 1910, valued at £389,578 ; 119,785 tons in 1909, valued at £341,886 ; and 109,681 tons in 1908, valued at £379,313.

There was an increase in the quantities of tea and sugar imported in 1912. The quantity of tea imported was returned as 33,874,960 lbs. in 1912 as compared with 33,047,616 lbs. in 1911 ; 34,024,592 lbs. in 1910 ; 34,334,832 lbs. in 1909 ; and 32,837,728 lbs. in 1908 ; the quantity of coffee imported showed a decrease, being returned at 1,216,544 lbs. in 1912 as compared with 1,258,320 lbs. in 1911 ; 1,206,464 lbs. in 1910 ; 1,274,784 lbs. in 1909 ; and 1,293,152 lbs. in 1908. The quantity of sugar imported was 2,785,793 cwts. in 1912 as compared with 2,721,965 cwts. in 1911 ; 2,800,988 cwts. in 1910 ; 2,857,832 cwts. in 1909 ; and 2,697,955 cwts. in 1908. The quantities of tea, coffee, and sugar mentioned here are gross weights.

The quantities of unmanufactured tobacco exported in 1909, 1910, and 1911 and of manufactured tobacco imported in 1908, 1909, and 1910, as published in previous Reports, have been revised in accordance with information received since the issue of the last Report. The figures published for unmanufactured tobacco imported and exported have been kindly furnished by the Customs and Excise Department, who guarantee their accuracy ; the figures for manufactured tobacco are those returned by portal authorities, &c. The following table shows the revised total quantities of the imports and exports of unmanufactured and manufactured tobacco during each of the years 1908 to 1912 :—

		Imports.		Exports.	
		Unmanufactured.	Manufactured.	Unmanufactured.	Manufactured.
		Lbs.	Lbs.	Lbs.	Llbs.
1908	..	11,374,445	3,079,524	1,768,513	6,451,888
1909	..	12,977,483	2,860,284	1,875,530	7,292,891
1910	..	14,183,918	3,189,312	1,907,503	7,550,598
1911	..	13,931,626	3,155,712	2,307,170	7,744,710
1912	..	15,884,015	4,031,496	1,921,241	8,208,810

The total estimated value of spirits, ales, wines, etc., imported, showed a fall from £1,195,515 in 1908, to
Spirits, Ales, £1,118,223 in 1909, but marked a slight increase
Wines, etc. to £1,171,339 in 1910, and £1,255,683 in 1911, but fell again in 1912 to £1,187,365. The imports of British spirits fell from a value of £50,452 in 1911 to £43,828 in 1912; foreign spirits fell from £103,513 in 1911, to £97,293 in 1912; and ale and beer from £588,775 in 1911 to £504,176 in 1912. The total estimated value of spirits, stout, porter, etc., exported amounted to £4,439,594 in 1912 as compared with £4,379,767 in 1911; £4,251,120 in 1910; £3,731,495 in 1909; and £4,280,838 in 1908. The value of home-made spirits, which fell from £2,299,964 in 1908 to £1,739,979 in 1909, increased to £2,045,300 in 1910, and to £2,050,199 in 1911, but fell again in 1912 to £1,960,136. The value is still below that of any year since 1904, with the exception of 1909. The value of stout and porter exported was estimated at £2,098,664 in 1912 as compared with £1,926,562 in 1911; £1,838,397 in 1910; £1,653,113 in 1909; and £1,642,660 in 1908. The export of aerated waters was estimated at £254,325 in 1912 as compared with £277,179 in 1911; £239,110 in 1910; £230,016 in 1909; and £223,936 in 1908.

Among sundry food stuffs, the chief items are biscuits and confectionery. The value of the imports of biscuits
Sundry Food- in 1912 was estimated at £129,369 as compared
Stuffs; Biscuits, with £117,415 in 1911; £106,707 in 1910; £100,080
Confectionery. in 1909; and £84,741 in 1908. The value of the exports of biscuits is much larger than the imports, and has shown a steady increase from £355,348 in 1908 to £388,724 in 1909; £487,157 in 1910; £507,777 in 1911; and £534,911 in 1912. In the returns under the head of confectionery the value of the imports is much greater than the exports, and increased from £346,049 in 1908 to £392,582 in 1909; £466,155 in 1910, £510,180 in 1911, but fell in 1912 to £442,563. The value of the exports of confectionery in 1912 was estimated at £97,181, as compared with £125,317 in 1911; £121,792 in 1910; £102,489 in 1909; and £96,364 in 1908.

In order to furnish the means for comparing the exports of
Imports of agricultural produce from Ireland with the
Agricultural imports of similar products from colonial and
Produce from foreign countries into the United Kingdom, a
Colonial and table is presented as Appendix II. showing for
Foreign Countries. the year 1912 the quantities and values of the chief articles of agricultural and horticultural produce imported into the United Kingdom* from British possessions and foreign countries and the corresponding quantities exported from Ireland to Great Britain.

*At present (excepting certain specified articles) the quantities and values of foreign and colonial goods imported are known for the United Kingdom only. Nothing beyond an estimate can be formed as to how far these goods are imports for consumption in Great Britain and how far for consumption in Ireland. For though the import of goods from Great Britain to Ireland is known, it cannot be said how far these goods are foreign or colonial and how far they are British produce. Thus in the case of butter, bacon, and eggs, it is known that the imports from Great Britain into Ireland are of foreign or colonial origin, and a close estimate could therefore be

This table will bring home to Irish producers and exporters the extent of the existing market in Great Britain, and the present strength in that market of the several competitors, while at the same time it shows the very important position which Ireland at present holds in the British market.

Thus in 1912 :—

(1) The value of cattle and beef exported from Ireland to Great Britain in 1911 and previous years was greater than the value imported into the United Kingdom from any country. In 1912, however, the value of the export from Ireland, which was £8,500,000, was smaller than the import from Argentina, which amounted to £11,500,000, but was very much greater than the import from Australia, which, though coming next in order of magnitude, amounted to only £1,400,000.

(2) The Irish export of sheep and mutton, valued in 1912 at £1,100,000, was the fourth greatest, being exceeded by the imports from New Zealand £4,500,000, Argentina £2,750,000, and Australia £1,750,000.

(3) As regards the total value of bacon, hams, pork, and live pigs, Ireland comes third on the list with a value amounting to £5,750,000 as compared with £7,800,000 from Denmark and £7,300,000 from the United States of America. The imports from Canada came fourth with a value of only £1,400,000.

(4) The export of poultry from Ireland was much greater than that from any other country into the United Kingdom, Ireland exporting to Great Britain poultry to the value of £1,037,771, while the values of the highest imports from other countries to the United Kingdom were—from Russia, £342,275 ; France, £178,126 ; and United States, £78,823.

(5) The Irish export of butter, value £4,159,972, to Great Britain was the second largest in quantity and value ; the export from Denmark into the United Kingdom being first, value £10,356,001, and that from Russia third, value £3,656,742.

(6) The Irish export of eggs was second largest in total quantity and value, amounting to 6,313,525 gt. hnds., valued at £2,926,582, the imports into the United Kingdom from Russia being the largest, amounting to 9,677,098 gt. hnds., valued at £3,951,028.

(7) The Irish export of potatoes, which amounted to 171,131 tons, was the largest quantity imported into Great Britain. The next

made of the net import of these commodities from colonial and foreign countries for consumption in Great Britain and in Ireland respectively. But in the case, for example, of flour much of the very large import from Great Britain into Ireland may be foreign, or it may be British milled flour made from foreign or from British wheat, and with most of the other articles the question is even more difficult. At present, therefore, it is not possible to show the foreign and colonial imports into Great Britain alone, or to furnish an exact comparison between the imports into Great Britain of Irish produce and colonial and foreign produce respectively.

largest quantities were imported from the Netherlands, France, and the Channel Islands. The quantity imported from the Channel Islands amounted to only 56,538 tons, but as their trade is chiefly in early potatoes, the value was greater than that of the Irish export.

(8) As regards oats, the export from Ireland was sixth, Argentina, Russia, United States, Germany, and Canada being the largest exporters to the United Kingdom.

The above cases are sufficient proof of the very strong position which Ireland holds in the markets of Great Britain, and as these are the great open markets of the world for agricultural produce, the figures bring out plainly the wide and representative character of Irish agricultural exports.* This consideration should, therefore, be kept in mind when comparisons are made between the export of particular commodities from Ireland and the corresponding export from any other country, such as the butter export of Denmark and that of Ireland. Thus, in the case of Denmark, which is frequently compared with Ireland, the total exports of home produce and manufacture to all countries in 1912 amounted to £32,930,929† of which £29,002,655 consisted of agricultural produce. The chief articles of export were butter, £10,615,827; pig produce, £7,853,437; eggs, £1,529,680; horses and foals, £1,008,788; cattle, £2,069,015. Over three-fourths of the Danish agricultural exports are sent to the United Kingdom. These figures present interesting contrasts with the present Irish agricultural exports, and bring into relief the more highly diversified interests which Ireland has as a country of production and export. Apart from Denmark, it is noteworthy that the country which is and promises to be the most serious competitor with Ireland in the British market, as regards the important articles of butter, eggs, and poultry, is Russia, the export from that country in 1912 amounting to, in butter, 683,650 cwts., valued at £3,656,742; eggs, 9,677,098 gt. hnds., valued at £3,951,028; and poultry, valued at £342,275.

II. RAW MATERIALS.

For the purposes of the broad classification adopted in the summary tables, pp. viii. and ix., raw materials include coal, coke, rough and sawn timber, boards and deals, stones, slates, sand, clay, metal ores and other mineral substances, hides, skins, horns and hoofs, wool, bristles, feathers, flax, raw cotton, hemp, jute, tow, waste, seeds, plants and bulbs, ice, &c. The total value of raw materials imported into Ireland in 1912 was estimated approximately at £10,780,697, as compared with £9,605,879 in 1911. The imports consist mainly of coal, wood, flax and other raw materials of the textile industries. There is also a large import of raw cotton, which is re-exported to Northern Europe.

*Irish export values are f.o.b., and thus do not include cost of transit from Irish Ports to British market centres; whereas foreign and Colonial imports are c.i.f., and thus include transit costs. This difference makes the total foreign values, *e.g.*, of eggs, butter, etc., appear somewhat higher relatively to the Irish than they actually are.

†This and the following figures in this paragraph are taken from the Danish Official Statistics, and are f.o.b. They are, therefore, more strictly comparable with the values of the Irish exports.

The exports in 1912 were estimated at a value of £4,468,459, as compared with £4,121,213 in 1911. Excluding the re-export of raw cotton, these consist mainly of animal produce, such as hides, skins, wool, fats, &c., and, to a lesser extent, of seeds, timber, and other vegetable produce.

The estimated values of the chief imports of raw materials in 1908—1912 were as follows:—

IMPORTS.

—	1908.	1909.	1910.	1911.	1912.
	£	£	£	£	£
Coal,	2,826,940	2,577,398	2,778,044	2,770,064	2,990,068
Slates,	89,087	144,898	139,904	120,574	120,322
Timber,	1,185,950	1,360,665	1,841,204	1,735,953	1,937,159
Flax,	1,381,479	1,912,667	1,867,372	1,955,355	2,416,958
Hemp and Jute, Tow and Codilla, ..	548,696	522,847	554,369	550,731	657,456
Lard, Tallow, &c., ..	330,494	471,265	376,051	269,996	197,585

The values of the chief exports in the same years were:—

EXPORTS.

—	1908.	1909.	1910.	1911.	1912.
	£	£	£	£	£
Timber	237,173	245,022	240,851	251,452	259,131
Hides and Skins, ..	486,754	614,106	610,622	596,577	700,564
Wool,	407,024	747,320	631,197	575,173	773,220
Lard, Tallow, &c., ..	494,695	625,978	507,980	412,028	415,008
Grass Seed,	368,866	403,070	371,570	371,388	333,094

In connection with the above figures it should be stated that the imports of wood and timber, estimated in 1912 at a value of £1,937,159, consist mainly of sawn timber, boards and deals, whereas 90 per cent. of the exported timber is shipped out of the country in the round or rough state—an uneconomic condition of affairs. The large export likewise, of hides and skins, amounting in 1912 to £700,564, should be compared with the imports of leather and leather goods, boots, shoes, saddlery, &c., which approximate a value of £2,300,000 of goods imported. Again, there is a very great export of wool, which amounted in 1912 to the large quantity of 17,673,600 lbs., of an estimated value of £773,220. It is estimated that over three-fourths of the total wool clip in Ireland is exported, and, while the output of the woollen industries in Ireland is also rising, the imports of woollen goods remain largely in excess of exports. Thus it is not simply in one branch, but in several—in wood, hides and skins, wool, as well as in various minor exports, such as feathers, kelp, and most of all in her store cattle—that Ireland is exporting the raw materials of industry.

III. MANUFACTURED ARTICLES.

The third division of Irish imports and exports is that of manufactured goods. In 1912 these represented an import the total value of which is estimated at, approximately, £36,000,000, or 49 per cent. of the total value of imports. The export of manufactured goods was estimated, approximately, at £28,000,000, or about 41 per cent. of the value of the total export.

To a greater extent than in the case of the imports and exports of either agricultural produce or raw materials the figures indicating the value of manufactured articles must be taken as only approximate in character. For while the existing returns indicate the actual gross weight and quantity of manufactured articles imported and exported, there is great difficulty in determining what is the quality and value of these goods, especially in the case of the more highly differentiated articles. So far as is at present possible the estimated values have been checked by means of wide and careful inquiries among importers and exporters, through whose courtesy in many cases exact data regarding the gross weight and value of representative consignments of goods have been obtained; but it cannot be too plainly said that until import and export returns are available, which specify the nature, quantity, and value of goods, any figures put forward with regard to the import and export value of manufactured articles can only be regarded as approximate in character. At the same time it should be clearly understood that the present returns are not arbitrary statements, that they are based on actual figures of weights of goods imported and exported, and on careful inquiries regarding value, and that they furnish as close an estimate as is at present possible of the extent and character of this class of Irish trade.

As there is a wide range of manufactured imports and exports, these have been divided, as in the previous Reports, into a number of main groups.

The first and largest group is that of the textiles. The combined imports and exports of manufactured textile goods amounted to a value estimated in 1912 at £39,330,839 as compared with £35,441,442 in 1911, £35,821,255 in 1910, £32,239,308 in 1909, and £25,829,080 in 1908, a sum almost five-eighths of the total value of manufactured imports and exports of Ireland, and which is between a quarter and a third of the total estimated value of all goods imported and exported to or from Ireland in the year 1912. This fact alone indicates the great importance of the textile group of manufactured goods. The combined textile imports—yarns, piece goods, and made-up goods—amounted in 1912 to an estimated value of £17,664,999, as compared with £15,684,490 in 1911, £15,730,952 in 1910, £14,793,765 in 1909, and £12,268,791 in 1908, while the corresponding textile exports showed an estimated value of £21,605,840 in 1912, £19,756,952 in 1911, £20,090,303 in 1910, £17,445,543 in 1909, and £13,560,289 in 1908.

Distinguishing yarns, thread, rope, cordage, &c., from piece goods and made-up goods, the value of the imports of
Yarns, Thread, the former was in 1912 estimated at £2,475,838 as
Rope, etc. compared with £1,986,452 in 1911, £1,882,847 in 1910, £2,265,312 in 1909, and £1,737,381 in 1908.

In this amount the chief items were cotton yarn £684,419; linen yarn, £1,086,208; woollen yarn, £253,738; and yarns unclassified (which inquiry shows to contain a large amount of woollen yarn), £135,703. There was also an import of thread, estimated at a value of £190,295. The value of the corresponding exports of yarn, thread, rope, twine, cordage, &c., was estimated in 1912 at £2,775,316 as compared with £2,735,387 in 1911, £2,645,990 in 1910, £2,160,556 in 1909, and £2,026,946 in 1908. Of this amount the main items were—linen yarn, £1,625,561; thread, £574,327; rope, cordage, and twine, £447,592.

Much the largest part, however, both of textile imports and exports consists of piece goods, ready-made goods, drapery, and apparel. The imports of these
Piece Goods, were estimated in 1912 at a value of £15,189,161
Drapery, etc. as compared with £13,698,038 in 1911, £13,848,105 in 1910, £12,528,453 in 1909, and £10,531,410 in 1908, and the exports at a value of £18,830,524 in 1912 as compared with £17,021,565 in 1911, and £17,444,313 in 1910.

The imports of piece goods, drapery, apparel, &c., are of a much more wide and varied character than the exports. The largest import is of drapery and apparel, the combined value of which was estimated at £6,579,828 in 1912 as compared with £5,577,614 in 1911, £5,860,083 in 1910, £5,653,474 in 1909, and £4,897,223 in 1908. The import of cotton goods was greater than in 1911, and was estimated at a value of £5,278,043 as compared with £4,688,668 in 1911, £4,657,439 in 1910; £3,980,367 in 1909, and £2,985,704 in 1908. The imports of woollen goods, including blankets and carpets, were estimated at £1,276,743 in 1912 as compared with £1,390,203 in 1911, £1,364,155 in 1910, £1,182,830 in 1909, and £1,129,194 in 1908. Altogether, apart from drapery and apparel, the quantities of cotton, linen, woollen, and silk goods imported in 1912 were estimated to amount to a sum of, approximately, £7,996,000. In the case of cotton goods imported, a considerable quantity is imported for purposes of further manufacture, and is then re-exported. In addition to these classes of finer textile fabrics, there are large imports of coarser stuffs, such as bags and bagging, oilcloth and canvas goods.

In the case of exports, the outstanding feature is the fact that three-fourths of the textile piece goods exported are returned as "linens," but this term in the returns of the portal authorities has a wide significance, and includes "unions" and goods which have only a linen "finish." The estimated value of exports of linen goods amounted to £14,005,636 in 1912 as compared with £12,584,884 in 1911, £13,342,998 in 1910, £11,996,663 in 1909, and £8,508,107 in 1908. The returns show an increase in the value of the exports of woollen

goods from £604,528 in 1911 to £690,557 in 1912, and imports are still largely in excess of exports. The total value of the exports of piece and made-up textile goods was estimated in 1912 at £18,830,524.

The second group is that of leather and leather manufactures.

**Hides, Skins,
Leather, Boots
and Shoes.**

Attention has already been drawn to the very large export of hides and skins, and the still greater import of leather, saddlery, boots and shoes. The exports of hides and skins in 1912, apart from the hides and skins of the live stock exported, amounted to an estimated value of £700,564, as compared with £596,577 in 1911. On the other hand, the import of leather was of a value estimated in 1912 at £590,686 as compared with £507,229 in 1911, £462,586 in 1910, £599,321 in 1909, and £531,933 in 1908, and the imports of boots and shoes were of a value estimated at £1,714,302 in 1912, as compared with £1,734,192 in 1911, £1,884,317 in 1910, £1,791,908 in 1909, and £1,750,937 in 1908. In addition to these sums there are the imports of saddlery, of leather belting, and of an item which is considerable but which cannot be ascertained from the existing returns, leather and kid gloves. Thus the total imports of leather and of leather manufacturers in 1912 may be estimated at, approximately, £2,300,000.

Large quantities of india-rubber goods are also imported, but it is very difficult to determine the extent and value of this import. The value is estimated at £421,796 in 1912, as compared with £387,473 in 1911, £343,985 in 1910, £340,885 in 1909, and £374,096 in 1908.

The third group is that of metals and metal articles, machinery, ships, &c. This group is a very wide class, and

**Metal and Metal
Manufactures.**

in gross annual value is next in importance to the textiles. It is estimated that in 1912 the total value of the imports of metals and metal manufactures reached almost £8,600,000, while the exports, which include the export of steam vessels, were estimated at £4,803,519. Among the metal imports, approximately, £2,348,000 consisted of steel, bar and wrought iron, and plates and sheets, imported chiefly into Belfast, while anchors and chains, bolts, rivets, nails and screws, rails, iron chairs, and other railway plant, represent a further import estimated at, approximately, £378,000. Thus the more simple articles of iron and steel manufactures represent a total import in 1912 of £3,242,000. Of the other metals, the import of copper was estimated in 1912 at £133,686; lead and lead piping at £96,459, brass and bronze at £54,810. With regard to the more highly manufactured classes of goods, the returns show very large imports of hardware utensils and implements, as well as of the heavier iron goods, such as ranges, stoves, meters, pumps, boilers and cylinders. The total value of these and similar articles in 1912 was estimated at £1,911,760. In addition, there are imports of machinery, chiefly agricultural and textile, and railway engines, estimated at £1,454,746, and of cycles and motor cars, estimated at £605,000.

As regards exports, considerable quantities of machinery are shipped from Belfast, while the export of steam vessels is of a very large annual value, estimated in 1912 at, approximately, £3,361,500, a decrease of over £1,000,000 compared with the previous year. Thus there are large individual exports in this class, but as a whole the trade in hardware and metal goods and manufactures stands in contrast to the textile trade. For whereas the value of the textile exports appears even greater than that of the imports there is a very large surplus of metals and metal manufactures imported over what is exported.

Of wooden manufactures also there is a very large import and only a small export. The item of greatest importance among the imports is furniture, though there is a difficulty in distinguishing removals of private furniture from what are genuine trade imports and exports. But, taking the total import and total export figures of furniture, the imports exceed in value the exports by a balance of close on £340,000 as compared with £327,000 in 1911. There is also a wide range of other classes of imported articles wholly or partly of wooden manufacture.

There is a very large annual import into Ireland of paper, stationery, cardboard, books and printed matter, estimated for the year 1912 at a total value of £1,205,283 as compared with £1,155,603 in 1911, £1,107,618 in 1910, £1,085,401 in 1909, and £1,093,404 in 1908. The estimated value of imported paper in 1912 was £613,620 ; stationery, £222,477 ; showcards, strawboards, &c., £169,777 ; books, approximately, £90,000. The exports of paper, cardboard, books, &c., in 1912 were estimated at £387,793 as compared with £366,273 in 1911, £353,536 in 1910, £356,668 in 1909, and £357,126 in 1908. The excess of imports over exports in paper, stationery, cardboard, &c., is thus very large, amounting in 1912 to an estimated value of almost £817,500, and in 1911 to over £789,000, and is one of the features of Irish trade which deserve particular attention.

Another class of imports which reaches a considerable annual value is that of the manufactures of clay, china, and glass goods. The total value of the imports of these goods was estimated in 1912 at £985,358 as compared with £928,294 in 1911, £873,047 in 1910, £846,531 in 1909, and £812,002 in 1908. In 1912 the import of bricks and tiles was estimated at £75,069 ; fire-clay, earthenware, and china goods at £270,476 ; glass, glassware, and bottles at £394,454 ; cement at £245,359. The contrast between the large import of these various classes of goods estimated at £985,358, and the export, estimated at £24,925, is very striking.

A further group of articles of great interest is that of chandlery, including under this heading such goods as candles, soap, starch, matches, oils, paints, polishes, &c. Many of these articles are being manufactured in Ireland, and to some extent exported, but in this

class of goods also there is a very considerable excess of imports over exports. The articles to which attention may be specially directed are as follows:—In 1912, candles imported, £104,462; exported, £5,045; soap imported, £217,402; exported £32,413; starch imported, £64,771; exported, £4,946; paints and varnish imported, £276,377; exported, £26,103; matches imported, £108,160; exported, £931. There is also a very large import of oils, chiefly petroleum and paraffin, estimated in 1912 at £1,294,438. Altogether this class of goods represents in 1912 an import of a value estimated at £2,237,212, the exports being estimated at £143,832.

The total value of chemicals, drugs, fertilisers, and dye stuffs imported in 1912 is estimated at £1,326,662, as compared with £1,187,773 in 1911. In the case of drugs and chemicals, goods of this class are frequently sent in small consignments, and the figures submitted in the tables, both of quantity and value, are in all probability considerably lower than the actual quantities and values imported. As regards artificial fertilisers, there is a large import, the estimated value in 1912 being placed at £765,970. There is also a considerable export, estimated in 1912 at £159,783. Dye stuffs imported in 1912 were of a value estimated at £35,508.

The above analysis indicates briefly the extent and character of Irish trade. With regard to the question of the source or “country of origin” of the imports and the final destination of the exports, as stated in previous Reports, the existing returns furnish little information. The trade which passes directly between Ireland and colonial and foreign countries is known, and the more important details as regards this trade at the chief ports in Ireland are presented annually by the Customs and Excise Department in their Statement of the Trade of the United Kingdom. The direct imports of foreign and colonial goods into Ireland during 1912 amounted to a value of £17,088,219, whereas the direct exports amounted to £1,337,271, of which £934,799 consisted of re-exports of foreign and colonial goods. But as regards the indirect colonial and foreign trade of Ireland which passes to and from the Irish ports *via* those of Great Britain, especially Liverpool and London, there are at present no means of distinguishing this from the colonial and foreign trade of Great Britain. Consequently the total trade of Ireland with countries outside of Great Britain cannot at present be ascertained.

At the same time, after examining carefully the quantities of goods shipped across Channel into and from Ireland, and as a result of inquiries made amongst traders, it is estimated that not more than one-fifth of Irish exports goes to colonial and foreign countries, the other four-fifths remaining in Great Britain; and while it is much more difficult to ascertain what proportion of imports into Ireland are of colonial or foreign origin, it seems probable that at least one-third are articles of such origin, the remaining two-thirds being the produce of Great Britain.

With regard to the total extent of the Irish import and export trade, the imports per head of population, according to the present returns, amount to £16 13s. 7d., and the exports per head of population to £15 8s. 6d.; or if the estimated value of re-exports is excluded, the imports amount to a value of £16 1s. 4d. per head of population, and the exports to £14 16s. 2d. per head of population. It is of interest to compare these amounts with the corresponding figures of the foreign trade of the chief industrial States as shown in the following table:—

STATEMENT showing for the year 1912, or latest available year, the estimated Population and the Value per head of Population of the Foreign Trade of the undermentioned countries:—

COUNTRY.	Estimated Population.	Thousand £'s (000's omitted.)		Imports per head of Population.	Exports per head of Population.
		Total Imports for Home Consumption.	Total Exports of Domestic Produce.

* Excluding re-exports estimated at £2,700,000.

As has been pointed out in preceding reports these figures indicate the wide difference which there is in the extent of foreign trade of different countries as measured per head of population. In some States, especially those of wide area and varied climatic conditions, the extent of foreign trade in proportion to the total production of the country is small. Thus it is that the United States of America, with a very great internal trade, has, per head of population, a small foreign

trade ; thus also Germany, with its great agricultural and industrial capacity for production, has a comparatively limited foreign trade per head of population. In all such cases increase or decrease in imports or exports is a very subordinate factor in the industrial progress of the country, and the growth of wealth depends chiefly on internal development and internal trade, and not on the exchange of commodities with other nations. On the other hand, countries which are small in size and with good maritime communication have in general a large foreign trade. Thus it is with Denmark, Belgium, and Holland ; thus also with Ireland.

This consideration has a very direct bearing on the question of the present returns. For the larger the foreign or external trade is in proportion to the internal trade, the greater to such a country is the importance of having as full and accurate as possible a record of this external or foreign trade. It is accordingly of the greatest importance to have as full and reliable a record as possible of the external trade of Ireland. Such a record is of great industrial and commercial value, and this commercial purpose is the main value of trade statistics such as are submitted in the present Report. As regards the wider inferences of national gain or loss, these require the evidence of very much fuller data.

The references in the Consular Reports to Irish trade in 1912 have been brought together as in the Reports
Appendices and for previous years and are reprinted in the first
Diagrams. Appendix. They represent the references to be found in the Consular Reports published since the last issue of this Report. In the second Appendix a table is presented showing the quantities and values of imports of the chief articles of agricultural and horticultural produce into the United Kingdom from British possessions and from foreign countries, and the corresponding exports from Ireland to Great Britain.

Two diagrams are also attached to the Report showing (I) the monthly export of butter from Ireland and the monthly import of butter from foreign and colonial countries into the United Kingdom ; and (II.) the monthly export of eggs from Ireland, and the monthly import of eggs from foreign and colonial countries into the United Kingdom.

From the first diagram it will be seen that the Irish export of butter in 1912 reached its height in the month of July. The shipments returned for that month amounted to 135,364 cwts. August was the second highest month of output, amounting to 115,592 cwts. June the third month September and October the fourth and fifth. The point of greatest increase in the output was between the months of April and May, the output for April amounting to 29,896 cwts. only, while for May the amount returned was 77,587 cwts. The comparison of the monthly export of butter from Ireland and the monthly import from Denmark is of very practical interest, especially

having regard to the monthly average of Irish Creamery Butter prices indicated by the prices line in the diagram.

From the second diagram, showing the exports of eggs, it will be seen that March, April and May were the months of heaviest export. The output, which rose rapidly from January onwards, fell away again after the month of April, and from May onwards there was a steady decline in the output until December, which marks the lowest point in the year. The fact also that Irish supplies are heaviest in the markets in the months when prices are lowest is plainly shown by a comparison of the lines indicating respectively the movement of prices and the changes in supplies.

A remarkable similarity exists in the curves representing the monthly exports of butter and eggs from year to year, and unfortunately in each case the months of largest Irish shipments are the months when prices are low, and the months of lowest Irish shipments are the months of highest prices.

In conclusion, I desire to acknowledge gratefully the assistance given by the port and harbour authorities of Ireland, the railway and shipping companies, and by many individual importers and exporters. I am also specially indebted to the Principal of the Statistical Office of the Customs and Excise Department, and to the Comptroller-General of the Commercial, Labour, and Statistical Department of the Board of Trade, for the information which they have kindly afforded.

I am, Sir,

Your obedient Servant,

THOMAS BUTLER,

*Superintendent of Statistics and
Intelligence Branch.*

APPENDIX I.

Extracts relating to Irish Trade with Foreign Countries, taken from the Consular Reports of the undermentioned Countries :—

A.—FOR THE YEAR 1911 (*continued from previous Report*).

EUROPE.

BELGIUM.

Ireland.—As regards the trade between Belgium and Ireland there is little to be said. Certainly statistics of the trade are included in the Belgian returns, but I have ascertained on previous occasions that the figures given do not in any way represent the importance of the trade between Ireland and this country. Not that any criticism is implied regarding the mode of compiling the statistics, for so far as information is available they are accurate, but owing to the fact that many goods imported from or exported to Ireland are sent by way of Great Britain the country of origin or destination is lost to view, and the customs necessarily enter the goods under the heading of the country from which or to which they are declared, and Irish trade loses a great part of the credit due to it in consequence. I have made many endeavours to ascertain a means by which an accurate estimate can be arrived at of Irish trade with Belgium, but I have now come to the conclusion that it is impossible, at any rate on this side to estimate with any degree of accuracy the importance of the trade. For the satisfaction of those interested in the matter it may confidently be stated that Ireland assumes a considerably more important rôle in the trade of Belgium than would appear to be the case from the statistics furnished in the annual returns, which will be found reproduced in Annexes 1 and 2.

Imports.—So far as the figures at my disposal can be relied upon, it is shown that the total imports into Belgium from Ireland amounted to 1,195 tons, of a value of £6,640, in 1911, as compared with 485 tons, valued at £4,060, in 1910; respective increases of 710 tons and £2,580. The principal items of import during the year were vegetables, amounting to 1,139 tons, valued at £4,480, and flax fibre, valued at £1,200. On the other hand the imports of 441 tons of iron and steel, valued at £1,120 in 1910, fell off to nothing in 1911.

Exports.—As regards exports, the figures are more likely to be nearly accurate than in the case of imports, for there are considerable quantities of merchandise sent direct from Belgium to Ireland in regard to which no mistake can be made. This applies particularly to flax and textiles, in which there is a considerable

trade with Ireland. In fact, in the Courtrai district of Belgium there is quite an Irish colony resident, principally engaged in the flax trade with the north of Ireland, many of the members of that colony being influential residents of the town of Courtrai.

The exports in 1911 show a considerable decline compared with the previous year. In 1910 they amounted to 31,385 tons, of a value of £1,555,800. In 1911 they declined to 23,090 tons, of a value of £881,680, a falling off of 8,295 tons and £674,120. This decline was almost entirely accounted for by the decrease of 6,059 tons and £497,440 in the textile exports (flax), and of 1,327 tons and £162,760 in exports of flax yarns.

Details of the export trade are given in Annex 2, so that a comparison can be made. There are no further remarks required in regard to the export trade, the figures speaking for themselves.

Under the heading of "Ireland" I may call attention to the remarks made earlier in this report regarding the Ghent Exhibition of 1913. In view of the importance of Ghent as a centre (in conjunction with Courtrai) of the Belgian flax industry, the Exhibition, in which, as stated, His Majesty's Government is taking part officially, should prove of considerable interest to Irish people, and would make a visit to this country well worth undertaking.

I am unable to give any particulars regarding the trade of Belgium with Ireland during the first half of 1912, as no statistics on the subject are published.

* Figures for 1911 not given.

† Figures for 1910 not given,

Marseilles.—Amongst the exports to Ireland were consignments
of 1 ton of castor oil and 1 ton of medicinal roots.

GERMANY.

Hamburg.—It is, as in previous years, not possible to furnish statistics of the trade between Hamburg and Ireland, as no special returns thereof are kept at this port.

Harburg.—The export of kainit shows a good increase, whereas no oilcakes were exported in 1911.

ITALY.

Ancona.—A quantity of carbide of calcium was shipped to Dublin.

NORWAY.

The imports from Ireland into Norway are officially stated to have amounted to about £3,000, the chief items being linen, felt and tape. The imports of about £1,000 worth of bleached linen yarn in 1910 were not repeated in 1911.

Fredrikstad.—The exports of flooring boards to Ireland were—1910, 10,444 c. metres; 1911, 10,175 c. metres.

RUSSIA.

Libau.—The exports to Ireland during 1911 were 8,562 cubic feet of planks and boards, 720 tons of oats to Belfast, and 442 vedro of spirit (alcohol) to Dublin.

Pernau.—The quantity of flax and codilla shipped to Ireland was 3,500 tons. There were also 5,261 bags of flaxseed, 5,189 tons of woodpulp, and 525 tons of oilcake.

Omsk.—The exports consisted of 7 casks of butter to Belfast via Riga.

Riga.—I am unable to furnish separate particulars with reference to trade with Ireland in 1911.

St. Petersburg.—The import from Ireland to this market was insignificant.

SPAIN.

Mazarron.—There is no direct trade with Ireland in this district.

Marbella.—It appears that no trade was carried on during the past year between this district and Ireland.

Bilbao.—Irish potatoes for seed again gave good results in quality, but the yield was much smaller than in previous seasons owing to the drought.

AFRICA.**MOROCCO.**

Rabat.—A certain quantity of Irish biscuits are now imported, and are gaining a good reputation.

ASIA.**CHINA.**

Shanghai.—The following were the imports of piece goods :—White Irishes, from Ireland, in 1909, 92,119 pieces ; 13,390 pieces in 1910, and 55,948 pieces in 1911.

Changshee.—The import of white Irishes was in 1909, 18,522 pieces ; 3,135 pieces in 1910, and 5,164 pieces in 1911.

AMERICA.**CHILI.**

There is no record of any direct trade with Ireland during the year 1911.

CURAÇOA.

No account is taken at the Customs of the share of trade contributed by Ireland, but it is believed that a large percentage of the total imports of fine biscuits come from Ireland. There is a steady demand for lace crochet, &c. ; damask, needlepoint, linens (including tweeds, serge, &c.).

Cargoes of phosphate of lime from Aruba are shipped yearly to Ireland.

If manufacturers in butter, condensed milk, tinned goods, and other Irish articles will send their travellers to this district, or, as already suggested, will correspond with me, and send their catalogues and samples, I shall be pleased to give them every possible assistance for opening up business.

PARAGUAY.

No particulars are available to show the trade carried on with Ireland.

UNITED STATES.

Hawaii.—Some cables and cordage and linen goods came from Ireland. The value of the imports in 1910 was £730, and in 1911 £230. The value of the exports to Ireland in 1910 nil, and in 1911 £20.

San Francisco.—Amongst the exports to Ireland in 1911 were 58,290,932 lbs. of barley, and 38,061,291 lbs. of wheat.

San Diego.—The imports from Ireland in 1911 were valued at £460.

Galveston.—Imports from Ireland during the Years 1909-11 were as follows :—

Portland.—The total value of the imports from Ireland during each of the three years 1909, 1910, and 1911 was £2,234, £2,423, and £1,623 respectively. The entries consisted principally of linens, laces, and spirits.

Port Townsend, etc.—The imports from Ireland were composed of linens, laces, ginger ale, and malted liquors. They amounted in value to £4,121 in 1909, £4,978 in 1910, and £4,658 in 1911.

B.—FOR THE YEAR 1912.

EUROPE.

FRANCE.

Bordeaux.—In 1911 and 1912 there were 7,458 gallons and 6,182 gallons respectively of wines in wood, and 110 gallons and 572 gallons respectively of wines in bottle exported direct to Ireland. There were also 132 gallons of brandy in wood and 22 gallons of brandy in bottle exported to Ireland in 1912.

Bayonne.—During the year 1912 no goods were imported direct from Ireland, and only 319 tons of slates were exported to that country.

Honfleur.—The export to Ireland *via* Southampton amounted to 170 tons of rye grass and 160 tons of champagne.

ITALY.

Marsala.—There has been no direct trade with Ireland during the year, and the only article exported to that country has been Marsala wine.

NORWAY.

Fredrikstad.—The export of timber to Ireland consisted of 10,175 cubic metres and 3,248 cubic metres of flooring boards in 1911 and 1912 respectively.

NETHERLANDS.

The following tables show, first, the direct imports from Ireland, and, second, the direct exports to Ireland during the Years 1910, 1911 and 1912 :—

RUSSIA.

Odessa.—There is no trade between Odessa and Ireland, except in fine handkerchiefs.

Nicolaiev.—One shipment of grain was made to Belfast. There was no import trade from Ireland.

A telescope, with a diameter of 32 inches, for the observatory situated in this town and now transferred from the control of the Admiralty Department to that of the Ministry of Public Instruction, as well as the papier-mâché superstructure of the tower in which it will be placed, has been ordered in Ireland.

AMERICA.

UNITED STATES.

San Francisco.—The value of the exports to Ireland, consisting chiefly of grain, amounted to £138,120.

San Diego.—The value of the imports from Ireland in 1912 was £680.

Baltimore.—The total value of the imports from Ireland was £88,805; and the exports to Ireland amounted to £375,072.

Chicago.—The values of the imports from Ireland in 1910, 1911 and 1912 were £92,469, £125,051, and £148,230 respectively.

New York.—The exports direct to Ireland amounted to £149,142; and the imports from Ireland were valued at £3,349,538.

Portland.—The value of the imports from Ireland in 1912 was £1,792.

Port Townsend.—The imports from Ireland in 1912, as in previous years, consisted of linen, laces, liquor, and ginger ale. The value of lace imports was £2,140.

Puget Sound.—The total value of the imports into Puget Sound (which includes Port Townsend) from Ireland amounted in 1910, 1911 and 1912 to £4,978, £4,658, and £6,238 respectively.

The following table, taken from the Statistical Abstract of the United States, 1912, shows the total value of the Import and Export Trade between Ireland and the United States during each of the last twenty years. This table does not cover the whole trade between Ireland and the United States. Goods manufactured or produced in Ireland, sold to firms in England, and by them exported to the United States, are, as a rule at least, accredited in the returns to England and not to Ireland. The quantities and values of Imports and Exports of particular commodities published in the Report on the Trade in Imports and Exports at Irish Ports during the year 1911 are the latest figures of the kind available.

[TABLE.
